1945 INDEX TO the OIL AND GAS JOURNAL

Special Numbers

Annual Statistical Number	January 27
Annual Refining Number	March 31
Semiannual Statistical Number	July 28
Annual Pipe-Line Number	September 22
Annual A.P.I. Number	November 17
Annual International Number	December 29

Contents of Index

Technical Articles on Engineering And Operating Subjects

Drilling ..... Page 1
Production ..... Page 3
Refining ..... Page 9
Pipe Line ..... Page 15
Natural Gas ..... Page 17
Natural Gasoline ..... Page 18
Exploration ..... Page 19

General News Shaping Industry Policy and Operations

Economics, General News .. Page 21
Trade Associations ..... Page 25
Field Developments ..... Page 26

Authors ..... Page 32

THE PETROLEUM INDUSTRY'S CROSS-SECTIONAL PUBLICATION

The OIL AND GAS JOURNAL

1945 INDEX

Technical Articles on Engineering and Operating Subjects

Drilling

	Date	Page
ACTIVITY, DRILLING		
Wells Completed in 1944 (Rotary, Cable, Field, Wildcats) and Planned for 1945, by Individual States—Number and Footage (Compiled by The Oil and Gas Journal)	1-27	170
Drilling Forecast for 1945	1-27	171
Completions in 1944 (Oil, Gas, Dry) by Individual States (Compiled by The Oil and Gas Journal)	1-27	172
Comparison of Well Completions by Years, 1937 through 1944	1-27	173
Exploratory and Development Drilling—Where it Occurred and the Results. Detailed Statistics on Well Completions and Footage Drilled, for both Development and Wildcat Basis (Compiled by The Oil and Gas Journal):		
Alabama	1-27	249
Arkansas	1-27	249
California	1-27	228
Colorado	1-27	230
Eastern States	1-27	255
Florida	1-27	251
Georgia	1-27	251
Illinois	1-27	255
Indiana	1-27	255
Kansas	1-27	252
Kentucky, Eastern	1-27	259
Kentucky, Western	1-27	259
Louisiana, North	1-27	247
Louisiana, South	1-27	247
Michigan	1-27	259
Mississippi	1-27	249
Montana	1-27	228
Nebraska-Missouri	1-27	252
New Mexico, Northwest	1-27	234
New Mexico, Southeast	1-27	239
Ohio	1-27	260
Oklahoma	1-27	251
Texas:		
East	1-27	241
Gulf Coast, Lower	1-27	242
Gulf Coast, Upper	1-27	244
North and West Central	1-27	239
Panhandle	1-27	237
South	1-27	242
South Central	1-27	242
West	1-27	237
Wyoming	1-27	230
Navy to Seek Funds to Extend Exploration at Elk Hills—L. P. Stockman	2-17	74
Atlantic Launches Program to Become Venezuela Producer—N. O. Fanning	2-17	75
New Peaks Reached in Bids from Drilling Rights on Public Land	2-24	118
Expanded Development Program in Prospect for Colorado's Rangely Field	4-14	96
Mississippi Drilling Activity at New High With 80 Rigs Now Running in State—Neil Williams	4-21	92
Review of Exploratory Drilling in 1944—Frederick H. Lahee	4-28	108
Hugoton Classified as "Restricted Area," Curbing New-Well Drilling	5- 5	70
Navy Seeks 64 New Wells in Elk Hills Naval Reserve	5- 5	74
Expanded Drilling Program Assured	5-12	90
More Wells Proposed by Industry in Second 6 Months—H. Stanley Norman	7-28	118
Well Completions Increase 12.9 Per Cent First Half of 1945—Charles J. Deegan	7-28	121
Drilling Increase Raises Phillips Expenditures	8- 4	54
Venezuelan Exploration Covers Extensive Area—Marian C. Cody	8-11	76
Drilling Contractors (I.P.A.A. Abs.)—Al Buchanan	10-20	102
BARGES (See Offshore)		
BITS (See Equipment; Practices)		
BLOWOUTS; FIRES; WILD WELLS		
Shell Oil Reestablishes Control in Louisiana's West Lake Verret Field—E. H. Short, Jr.	5-12	95
Unusual Methods Used in Killing Wild Gas Well in Cement Field, Oklahoma—Paul Reed	7- 7	79
CASING		
California A.P.I. Meet Hears Kettenburg on Casing Failures—L. P. Stockman	4- 7	64
World's Longest String of 7-Inch Casing Is Set in Gulf Coast Well—E. H. Short, Jr.	4-14	113
Oil-Well Casing Failures—R. J. Kettenburg and F. R. Schmieder	4-14	116
CEMENTING		
New Type Casing Shoes Pack Off Bottom of Hole During Cementing—Kenneth B. Barnes	3- 3	57
Methods of Preventing Capillary Rise and Capillary Spreading of Water in Oil Wells	3-24	95
Plastics Now Adapted to Remedial Work in Kansas Wells	4-28	117
Method for Determining Minimum Waiting on Cement Time (A.I.M.E. Abs.)—R. Floyd Farris	10-13	94
COMPLETIONS (also see heading under "Production")		
Gulf Coast Innovations in Gravel-Packing Technique—E. H. Short, Jr.	2-10	97
Salt-Water Flows and Circulation Losses Persist in Branch Field Completions—E. H. Short, Jr.	2-24	133
Erath Cycling Operation	3-17	65
Screens for Wells Having Unconsolidated Oil Sands—F. B. Plummer	4-21	139
Use of Gravel as a Screen for Unconsolidated Oil Sands—F. B. Plummer	4-28	149
Prepacking Gravel Screens—F. B. Plummer	5- 5	119
Special Technique Promises to Change Future Lime-Completion Practices (Includes Haynesville Field and Production Data)—Paul Reed	5-19	137
Fluorochemistry in Petroleum Science—Jack De Ment	6- 2	75
Multistage Acidization Increases Recovery and Productivity From Multizone Wells—Kenneth B. Barnes	6- 9	99
Well-Completion Methods in Ark-La-Tex Area—Paul Reed	7-14	130
Well Completions Increase 12.9 Per Cent First Half of 1945—Charles J. Deegan	7-28	121
Triple-Zone Completions in Eastern Venezuela	12-29	227
CORING (for Core Analyses, see heading under "PRODUCTION"		
New Portable Exploratory Drill Embodies Revolutionary Principles—Neil Williams	3-31	304
Special Diamond Coring Recovers Nearly 100 Per Cent in Lime Formations—Kenneth B. Barnes	11-24	98
DEEP WELLS		
Problems Encountered in Cutting and Fishing Below 13,000 Ft.—E. H. Short, Jr.	6-30	98
Phillips Testing World's Deepest Well	8-18	98
Two 24-Cylinder, 2-Cycle Quad Diesel Units Drilled Oklahoma's Deepest Well—Kenneth B. Barnes	9-15	103
Drilling Suspended at 13,034 Ft. on South America's Deepest Test—Marian C. Cody	10-27	81
Oklahoma at Important Threshold with New Deep Pools—Kenneth B. Barnes	12- 8	76
DEEPENING (See Practices and Reconditioning)		
DIRECTIONAL; ORIENTED; SURVEYS		
Shell Oil Reestablishes Control in Louisiana's West Lake Verret Field—E. H. Short, Jr.	5-12	95
Unusual Methods Used in Killing Wild Gas Well in Cement Field, Oklahoma—Paul Reed	7- 7	79
San Miguelito is Outstanding Example of Modern Oil-Field Engineering—Kenneth B. Barnes	8-11	84
Directional Drilling Used as Exploratory Tool in Gulf Coast Well—E. H. Short, Jr.	9- 8	111
Horizontal Drilling Restores Well Which Had Been Abandoned 17 Years—L. P. Stockman	10- 6	89
Wells Slanted Out 3,700 Feet Tap Under-Ocean Pool—Kenneth B. Barnes	11- 3	82
DRILL PIPE (see Equipment; Practices)		
ECONOMICS (see Specific Headings and "ECONOMICS")		

XUM

	Date	Page
ENGINEERING FUNDAMENTALS (a series; for other articles see this heading under "PRODUCTION")		
Screens for Wells Having Unconsolidated Oil Sands—No. 182	4-21	139
Use of Gravel as a Screen for Unconsolidated Oil Sands—No. 183	4-28	149
Prepacking Gravel Screens—No. 184	5- 5	119
Care and Treatment of Old Oil Wells to Maintain Maximum Productivity—No. 191	6-23	131
Removal of Drilling Mud from Well Faces—No. 194	7-14	137
Dissolving Mud Sheaths by Acidizing—No. 209	11-10	109
Construction of Concrete Foundations—No. 212	12- 1	103
EQUIPMENT (also see Practices, other specific Subjects)		
New Type Casing Shoes Pack Off Bottom of Hole During Cementing—Kenneth B. Barnes	3- 3	57
New Portable Exploratory Rotary Drill Embodies Revolutionary Principles—Neil Williams	3-31	304
Portable Drilling Unit is Developed for Slim Holes in Exploration Work	4-14	108
Modifications of Standard Methods Achieve Improved Drilling Efficiency—Paul Reed	4-21	118
Electronics—Its Application to Petroleum Technology—Part I—Fabian R. Staley	5- 5	82
New Diesel-Powered Rig Incorporates Advances in Automatic Control—Neil Williams	5- 5	97
Bending Device for Tubing and Small Pipe	5-26	122
Electronics—Its Application to Petroleum Technology—Part 2—Fabian R. Staley	5-26	123
Electronics—Its Application to Petroleum Technology—Part 3—Fabian R. Staley	6-16	120
Problems Encountered in Cutting and Fishing Below 13,000 Ft.—E. H. Short, Jr.	6-30	98
Technical Export-Crating Skill Insures Undamaged Delivery of Rotary Rigs—E. H. Short, Jr.	7-14	98
Modern Rotary Drilling Machinery and Practices—A series by W. S. Crake		
Part 1—General Fundamentals	7- 7	76
Part 2—General Fundamentals	7-14	122
Part 3—The Hydraulic System	7-21	108
Part 4—Slush Pumps and Rotary	7-28	143
Part 5—Power and Portability	8- 4	83
Part 6—Drilling Practices	8-11	103
Part 7—Looking Ahead	8-18	128
Compounding of Power Driven Slush Pumps Proves Practical—E. H. Short, Jr.	8- 4	79
Special Mechanical Safeguards Installed on Deep Drilling Rig—Neil Williams	9- 8	86
Directional Drilling Used as Exploratory Tool in Gulf Coast Well—E. H. Short, Jr.	9- 8	111
Two 24-Cylinder, 2-Cycle Quad Diesel Units Drilled Oklahoma's Deepest Well—Kenneth B. Barnes	9-15	103
Rowan Initiates Postwar Diesel-Electric Rig Layout—E. H. Short, Jr.	10-13	100
Substructure-Design Innovations Feature Modern Diesel-Powered Rig—Neil Williams	10-20	125
Unitized Mobilized Drilling—Kenneth B. Barnes	11-10	76
Special Diamond Coring Recovers Nearly 100 Per Cent in Lime Formations—Kenneth B. Barnes	11-24	98
FISHING		
Problems Encountered in Cutting and Fishing Below 13,000 Ft.—E. H. Short, Jr.	6-30	98
JOURNALOG; COMPLETE DRILLING DATA		
Journalog on Discovery Well of Sand Draw Field, Fremont County, Wyoming	3-10	85
Journalog on Discovery Well, Ellenburger Production, Rhodes Field, Lea County, New Mexico	4-21	143
Journalog on Discovery Well, TXL Field, Ector County, Texas	5-19	155
Journalog on Discovery Well, Pre-Permian Horizons, Monument Area, Lea County, New Mexico	9-22	323
MAINTENANCE (see Practices)		
MODERN DRILLING (concerned with new rigs)		
New Portable Exploratory Rotary Drill Embodies Revolutionary Principles—Neil Williams	3-31	304
Cardwell Model O Twin-Engine Draw Works	5-26	150
Two 24-Cylinder, 2-Cycle Quad Diesel Units Drilled Oklahoma's Deepest Well—Kenneth B. Barnes	9-15	103
Unitized Mobilized Drilling—Kenneth B. Barnes	11-10	76
MUDS, MUD PRACTICES AND SYSTEMS		
Salt-Water Flows and Circulation Losses Persist in Branch Field Completions—E. H. Short, Jr.	2-24	133
Precautions in Drilling Control Aid Deep Development at Cranfield—Neil Williams	4-14	102
Field Testing of Drilling Muds—Vernon B. Zacher	4-21	108
Modifications of Standard Methods Achieve Improved Drilling Efficiency—Paul Reed	4-21	118
Mud Programs Aid in Economical and Efficient Drilling—R. E. Dansby	6- 9	80
Drilling-Mud Problems—With Suggested Solutions for Several Types—R. E. Dansby	6-16	135
Drilling-Mud Problems—With Suggested Solutions for Several Types—R. E. Dansby	6-23	115
Compounding of Power-Driven Slush Pumps Proves Practical—E. H. Short, Jr.	8- 4	79
Some Recent Developments in Mud Analysis Logging (A.I.M.E. Abs.)—B. Otto Pixler	10-20	159
Effect of Arsenates on the Viscosity of Drilling Muds (A.I.M.E. Abs.)—B. C. Craft and C. M. Moncrief	10-20	159
Drilling-Mud Suit Attracts Technicians, Scientists	11-17	157
OFFSHORE		
Scraper Barge Performs Triple Function in Gulf's Quarantine Bay Operations—E. H. Short, Jr.	4-28	114
Shell Oil Reestablishes Control in Louisiana's West Lake Verret Field—E. H. Short, Jr.	5-12	95
Verbal Clashes Mark Hearing on Ownership of Tideland Oil	6-30	81
Flood Control at Krotz Springs—E. H. Short, Jr.	8-25	112
Wells Slanted Out 3,700 Feet Tap Under-Ocean Pool—Kenneth B. Barnes	11- 3	82
Interstate Compact Discusses Submerged Lands, Natural Gas, Economic Trends—Kenneth B. Barnes	12-22	48
OPERATING IDEAS (also see Practices)		
Butane Vaporizer Uses Engine Radiator Water	1-13	62
Concrete Base for Drilling and Completed Wells	1-13	62
Quick Connections for Portable Equipment	1-13	62
Unitized Boiler Feed-Water Pump Assembly	1-20	78
Dual Substructure Units Designed for Drilling-Rig Engine Foundation	1-20	79
Reel for Drilling-Line Dead End Fabricated From Discarded Metal	1-20	79
Efficient and Economical Mud System Uses V-Shaped Trenches	1-20	79
PRACTICES		
New Drilling Problems Face Operators in Everglades District of Florida—Neil Williams	1- 6	44
East Pauls Valley Pool Presents Study of Modern Drilling and Completion Practices—Paul Reed	1-13	58
Provision of Drilling Sites Poses Difficult Engineering Problems in Louisiana Field—Neil Williams	1-20	72
Portable Rotary Drill Cuts Giant Cores—Kenneth B. Barnes	2-17	111
Geological Eccentricities in Mississippi Pose Completion and Production Problems—Neil Williams	2-24	124
Proposed Exploratory Work Would Help Determine Extent of Elk Hills Reserve—L. P. Stockman	2-24	157
Power-Driven Rotary Slip Operate Successfully on Gulf Coast Well—E. H. Short, Jr.	3-10	50
Precautions in Drilling Control Aid Deep Development at Cranfield—Neil Williams	4-14	102
Portable Drilling Unit is Developed for Slim Holes in Exploration Work	4-14	108
World's Longest String of 7-Inch Casing is Set in Gulf Coast Well—E. H. Short, Jr.	4-14	113
Modifications of Standard Methods Achieve Improved Drilling Efficiency—Paul Reed	4-21	118
Plastics Now Adapted to Remedial Work in Kansas Wells	4-28	117
New Diesel-Powered Rig Incorporates Advances in Automatic Control—Neil Williams	5- 5	97
Shell Oil Reestablishes Control in Louisiana's West Lake Verret Field—E. H. Short, Jr.	5-12	95
Fullerton Pool is Guidepost in Developing Clear Fork and Devonian Reserves—Kenneth B. Barnes	6- 2	69
Mud Problems Aid in Economical and Efficient Drilling—R. E. Dansby	6- 9	80
Preparing Swamp Locations in Coastal Louisiana—Neil Williams	6- 9	93
Drilling-Mud Problems—With Suggested Solutions for Several Types—R. E. Dansby	6-16	135
Modern Rotary Drilling Machinery and Practices—A series by W. S. Crake		
Part 1—General Fundamentals	7- 7	76
Part 2—General Fundamentals	7-14	122
Part 3—The Hydraulic System	7-21	108
Part 4—Slush Pumps and Rotary	7-28	143
Part 5—Power and Portability	8- 4	83
Part 6—Drilling Practices	8-11	103
Part 7—Looking Ahead	8-18	128
Extreme Precautions Taken in Drilling Well in Downtown Los Angeles—Kenneth B. Barnes	7-21	102
Compounding of Power-Driven Slush Pumps Proves Practical—E. H. Short, Jr.	8- 4	79
Paloma Unit—An Advanced Oil, Gas, and Products Producing Operation—Kenneth B. Barnes	8-18	112
Special Mechanical Safeguards Installed on Deep Drilling Rig—Neil Williams	9- 8	86
Five Fields With 51 Wells in Iran Produce Total of 365,0000 Bbl. of Crude Daily—C. O. Willson	10- 6	74
Horizontal Drilling Restores Well Which Had Been Abandoned 17 Years—L. P. Stockman	10- 6	89
Method for Determining Minimum Waiting on Cement Time (A.I.M.E. Abs.)—R. Floyd Farris	10-13	94

	Date	Page
Substructure-Design Innovations Feature Modern Diesel-Powered Rig—Neil Williams	10-20	125
Bahrein Concession Development Based on Maximum Recovery by Natural Flow—C. O. Willson	10-27	98
Saudi Arabian Petroleum Operations Are Rapidly Reaching Major Proportions—C. O. Willson	11- 3	70
Special Diamond Coring Recovers Nearly 100 Per Cent in Lime Formations—Kenneth B. Barnes	11-24	98
Difficult Drilling and High Costs Attend Development of Rangely Field—Neil Williams	12-22	44
RECONDITIONING WORK (also see Practices)		
Unusual Measures Are Employed in Workover Job—Charles J. Deegan	5-26	152
Care and Treatment of Old Oil Wells to Maintain Maximum Productivity—F. B. Plummer	6-23	131
Removal of Drilling Mud From Well Faces—F. B. Plummer	7-14	137
Power-Driven Tong is New Tool for Uniform, Efficient Tubing Jobs—Kenneth B. Barnes	7-28	146
Horizontal Drilling Restores Well Which Had Been Abandoned 17 Years—L. P. Stockman	10- 6	89
RIGS (see Practices; Modern Drilling)		
SAFETY		
Special Mechanical Safeguards Installed on Deep Drilling Rig—Neil Williams	9- 8	86
TIME; RATE (also see Journalogs; Practices)		
Mechanical Drilling-Time Recorder Improves Efficiency—Paul Reed	1-20	80
Six Different Engineering Methods Compared in Study of Pay Formations—Kenneth B. Barnes	4- 7	70

Production

	Date	Page
ACID TREATMENT		
Six Different Engineering Methods Compared in Study of Pay Formations—Kenneth B. Barnes	4- 7	70
Multistage Acidization Increases Recovery and Productivity from Multizone Wells—Kenneth B. Barnes	6- 9	99
Significance of Declining Productivity Index (Abs.)—C. V. Millikan and Herbert Beardmore	9-29	123
Geology of Acidizing—Kenneth B. Barnes	10-13	141
The Chemistry of Acidizing—Kenneth B. Barnes	10-20	163
The Technique of Acidizing—Kenneth B. Barnes	10-27	129
Results of Acidizing—Kenneth B. Barnes	11- 3	123
Dissolving Mud Sheaths by Acidizing—Kenneth B. Barnes	11-10	109
Tests for Acid Solubility; Spent Acid-Water—Kenneth B. Barnes	11-17	295
Selective Acidization Procedures at Carthage Field Result in Greater Productivity and Larger Ultimate Recovery—Neil Williams	12-22	56
CEMENTING, SPECIAL PURPOSES (also see heading under "DRILLING")		
Methods of Preventing Capillary Rise and Capillary Spreading of Water in Oil Wells	3-24	95
CHEMISTRY		
Scale-Forming and Corrosive Tendencies of Water Predicted by Rapid Methods—Joe R. Wright	6-23	99
Stability Index Judges Cooling Water—Joe R. Wright	7-14	112
Chemical Treatment for Oil-Field Water for Injection into the Ground—F. B. Plummer	7-28	157
Effect of Sulfate Reduction on Conditioning of Oil-Field Water—F. B. Plummer	9- 8	121
N.G.A.A. Standard Table of Physical Constants for Paraffin Hydrocarbons	10-13	115
The Chemistry of Acidizing—Kenneth B. Barnes	10-20	163
Petroleum vs. Plutonium—Clark Goodman	11-17	227
CLEANING OUT (see Reconditioning, also this heading under "DRILLING")		
COMPLETION (Multiple type listed separately; also see this heading under "DRILLING")		
East Pauls Valley Pool Presents Study of Modern Drilling and Completion Practices—Paul Reed	1-13	58
Gulf Coast Innovations in Gravel-Packing Technique—E. H. Short, Jr.	2-10	97
Geological Eccentricities in Mississippi Pose Completion and Production Problems—Neil Williams	2-24	124
Salt-Water Flows and Circulation Losses Persist in Branch Field Completions—E. H. Short, Jr.	2-24	133
Completion Practices in Heidelberg Field Are Undergoing State of Evolution—Neil Williams	3- 3	50
New Type Casing Shoes Pack Off Bottom of Hole During Cementing—Kenneth B. Barnes	3- 3	57
Tubing and Casing Corrosion Combated by Treated Water—Frank B. Taylor	3-31	306
Use of Surface-Active Chemicals to Increase Oil Ratios and Reduce Emulsification in Oil Wells	4- 7	107
Precautions in Drilling Control Aid Deep Development at Cranfield—Neil Williams	4-14	102
COMPLETIONS, GENERAL (also see this heading under "Drilling")		
Screens for Wells Having Unconsolidated Oil Sands—F. B. Plummer	4-21	139
Use of Gravel as a Screen for Unconsolidated Oil Sands—F. B. Plummer	4-28	149
Prepacking Gravel Screens—F. B. Plummer	5-5	119
Special Technique Promises to Change Future Lime-Completion Practices (Includes Haynesville Field and Production Data—Paul Reed	5-19	137
Fluorochemistry in Petroleum Science—Jack De Ment	6- 2	75
Well-Completion Methods in Ark-La-Tex Area—Paul Reed	7-14	130
Well Completions Increase 12.9 Per Cent First Half of 1945—Charles J. Deegan	7-28	121
COMPLETIONS; MULTIPLE		
Erath Cycling Operation	3-17	65
Multistage Acidization Increases Recovery and Productivity From Multizone Wells—Kenneth B. Barnes	6- 9	99
Seeligson Field Outstanding on Several Counts, Especially Its Multiple Pay Zones—Charles J. Deegan	8-11	74
Selective Acidization Procedures at Carthage Field Result in Greater Productivity and Larger Ultimate Recovery—Neil Williams	12-22	56
Triple-Zone Completions in Eastern Venezuela	12-29	227
COMPRESSORS (also see this heading under "NATURAL GAS")		
Vibration in Compressor Plant Piping—M. L. Arnold	1- 6	54
Closed System of Intermittent Gas Lift Applied in Single-Well Operation—E. H. Short, Jr.	10-27	113
CONNATE WATER (see Interstitial Water)		
CONSERVATION (see articles under Pressure Maintenance; Unitization, etc.)		
CORE ANALYSIS		
Portable Rotary Drill Cuts Giant Cores—Kenneth B. Barnes	2-17	111
Applications of Darcy's Law—Park J. Jones	3-10	71
Six Different Engineering Methods Compared in Study of Pay Formations—Kenneth B. Barnes	4- 7	70
Fluorochemistry in Petroleum Science—Jack De Ment	6- 2	75
Maljamar Cooperative Repressuring Project Covers Many Operational Phases—Kenneth B. Barnes	6-30	90
An Application of Statistical Methods to Data of Porosity and Permeability of Dolomitic Limestone (A.I.M.E. Abs.)—A. C. Bulnes	10-13	94
A New Technique for Determining the Porosity of Drill Cuttings (A.I.M.E. Abs.)—M. A. Westbrook and J. F. Redmond	10-20	159
A Neutron Method for Measuring Saturations in Laboratory Flow Experiments (A.I.M.E. Abs.)—E. Brunner and E. S. Mardock	10-20	159
Wax Saturations in Oil Sands (Abs.)—J. C. Calhoun and S. T. Yuster	11-17	167
Interactions Between Interstitial and Injected Water—A Review—A. J. W. Headlee	11-17	219
Special Diamond Coring Recovers Nearly 100 Per Cent in Lime Formations—Kenneth B. Barnes	11-24	98
Oklahoma at Important Threshold With New Deep Pools—Kenneth B. Barnes	12- 8	76
CORROSION (for other articles, see "PIPE LINE," "NATURAL GAS," "REFINING")		
Internal Corrosion of Tubing in Gas-Condensate Wells Measured by Recording Calipers—E. H. Short, Jr.	1- 6	46
Recent Progress in the Mitigation of Underground Corrosion—Kirk H. Logan	1-13	78
Girbotol Process	3-31	186
Phenolate Process	3-31	188
Thylox Process	3-31	191
Unisol Process	3-31	192
Tubing and Casing Corrosion Combated by Treated Water—Frank B. Taylor	3-31	306
Bureau of Standards Studies Zinc Anodes	5-12	151
Technical Editors Visit Corrosion Project	6-16	102
Scale-Forming and Corrosive Tendencies of Water Predicted by Rapid Methods—Joe R. Wright	6-23	99
Penetron Quickly Determines Steel Thickness—Also,		

	Date	Page
Without Connection to Fluids, Finds Levels and Densities	6-30	106
Maljamar Repressuring Plant Expanded in Logical Steps—Kenneth B. Barnes	7- 7	104
Stability Index Judges Cooling Water—Joe R. Wright	7-14	112
Rustless Pipe for War and Peace—Frederick Squires	8- 4	70
Preventing Corrosion in Water-Disposal Systems—F. B. Plummer	8-11	123
Marine-Corrosion and Cathodic-Protection Tests at Kure Beach Station—Fabian R. Staley	8-25	108
Condensate-Well-Corrosion Broadened by N.G.A.A.	9- 8	83
Formaldehyde as an Inhibitor of Corrosion Caused by Hydrogen Sulfide (A.I.M.E. Abs.)—P. L. Menaul and T. H. Dunn	10-13	93
Corrosion Inhibitor Promises Huge Returns—Kenneth B. Barnes and Charles J. Deegan	10-27	84
Measuring Distribution of Liquids in Flowstring of a Gas-Condensate Well—C. K. Eilerts, R. V. Smith and V. L. Barr	12-15	91
Probolog Spots Corrosion, Cracks, Holes in Exchanger Tubes	12-15	121
Corrosion-Resisting Plastic Material Applied to Oil-Field Equipment in Place—E. H. Short, Jr.	12-22	59

CYCLING (also see Pressure Maintenance)

Natural Gasoline and Cycling Trends	1-27	179
The Volume Factor per Barrel of Condensate—Park J. Jones	2- 3	51
Chicago Corp. to Build Carthage Field Plant	2- 3	79
Pressure-Maintenance Plant Completed in Texas	2-17	131
Hearing on Cycling Rules for Lisbon Held Open	2-17	131
Texas Gives Incentive to Gas Cycling Operations	2-24	117
Erath Cycling Operation	3-17	65
Recovery of Condensate by Cycling—Park J. Jones	5-19	128
Displacement Factors—Park J. Jones	5-26	139
Invasion Factors and Patterns—Park J. Jones	6- 2	97
Lone Star to Build Cycling Plant in Chapel Hill Area	8- 4	117
Paloma Unit—An Advanced Oil, Gas, and Products Producing Operation—Part 1—Kenneth B. Barnes	8-18	112
Texas Cycling Operations Increase 15 Fold During Past 7 Years—E. H. Short, Jr.	8-18	120
Paloma Unit—An Advanced Oil, Gas, and Products Producing Operation—Part 2—Kenneth B. Barnes	8-25	117
Methods of Tracing Migration of Gas in Repressuring and Recycling Operations—F. B. Plummer	10- 6	119
The Electrolytic Model and Its Application to the Study of Recovery Problems (A.I.M.E. Abs.)—Holbrook G. Botset	10-13	94
Plans Made for Processing Units in Carthage Field	10-13	157
Performance of Distillate Reservoirs in Gas Cycling (A.I.M.E. Abs.)—W. Hurst and A. F. Van Everdingen	10-20	159
Lake Creek Cycling Project Example of Applied Engineering Technique—E. H. Short, Jr.	12- 1	64
Process Improvements Mark Design and Operation of Abercrombie Plant	12-15	88
Measuring Distribution of Liquids in Flowstring of a Gas-Condensate Well—C. K. Eilerts, R. V. Smith, and V. L. Barr	12-15	91
Application of Diethylene Glycol-Water Solution for Dehydration of Natural Gas—N. K. Senatoroff	12-15	98

DISTILLATE FIELDS (see Cycling)

ECONOMICS (see specific headings, and "ECONOMICS")

ELECTRIC LOGGING; PILOTS; MEASURING INSTRUMENTS

Internal Corrosion of Tubing in Gas Condensate Wells Measured by Recording Calipers—E. H. Short, Jr.	1- 6	46
Mechanical Drilling-Time Recorder Improves Efficiency—Paul Reed	1-20	80
Electrical Logging Widely Employed in Rocky Mountain Exploratory Tests—Charles J. Deegan	4- 7	60
Six Different Engineering Methods Compared in Study of Pay Formations—Kenneth B. Barnes	4- 7	70
Precise Measurement of Deep Electrical Anomalies (Abs.)—Thomas S. West and Clarence C. Beacham	4-14	96
Radioactivity Well Logging—V. J. Mercier	5- 5	90
Unusual Methods Used in Killing Wild Gas Well in Cement Field, Oklahoma—Paul Reed	7- 7	79
Seeligson Field Outstanding on Several Counts, Especially Its Multiple Pay Zones—Charles J. Deegan	8-11	74
Running Instruments in Annulus of Tubed Wells (A.I.M.E. Abs.)—C. C. Olson	11- 3	110
Annulus Method of Locating Water in an Oil Well (A.I.M.E. Abs.)—John Hagestad	11- 3	110

ELECTRICAL (see specific phases and also listings under "DRILLING")

EMULSIONS (also see Treating)

Treatment of Heavy Oil Emulsions in Mississippi Field Presents Problems—Neil Williams	2- 3	59
Prevention and Treatment of Petroleum Emulsions—Charles M. Blair, Jr.	7-21	116

ENGINEERING FUNDAMENTALS (a series; for other articles see this heading under "DRILLING")

Application of Permeability and Viscosity Measurements to Oil-Reservoir Studies—No. 167	1- 6	79
Application of Radial Permeability to Oil-Reservoir Problems—No. 168	1-13	89
Application of Radial-Permeability Computations to Oil-Reservoir Problems—No. 169	1-20	85
Underground Water in Oil Fields—No. 170	1-27	271
Identifying Waters Without Complete Analysis—No. 171	2- 3	69
Identification of Oil-Field Waters by Means of pH Determination—No. 172	2-10	117
Effect of Mixtures of Oil and Water on Production of Oil—No. 173	2-17	119
Wetting Agents—No. 174	2-24	153
Methods of Demonstrating and Measuring Surface Tensions of Water and Oil—No. 175	3- 3	85
Methods of Measuring Interfacial Tensions—No. 176	3-10	81
Application of Surface Chemistry to Oil-Production Problems—No. 177	3-17	127
Methods of Preventing Capillary Rise and Capillary Spreading of Water in Oil Wells—No. 178	3-24	95
Methods of Reducing Capillary Penetration of Excess Water Around an Oil Field by Pumping—No. 179	3-31	311
Use of Surface-Active Chemicals to Increase Oil Ratios and Reduce Emulsification in Oil Wells—No. 180	4- 7	107
Oil-Injection Method of Increasing Production of Wells Producing Oil and Water—No. 181	4-14	141
Screens for Wells Having Unconsolidated Oil Sands—No. 182	4-21	139
Use of Gravel as a Screen for Unconsolidated Oil Sands—No. 183	4-28	149
Prepacking Gravel Screens—No. 184	5- 5	119
Gaging Tanks and Measuring Rate of Flow of Oil Wells—No. 185	5-12	137
Method of Computing Gage Tables From Tank Measurements—No. 186	5-19	149
Corrections in Measurements of Crude-Oil Volumes—No. 187	5-26	161
Measuring Water Production From Oil Wells—No. 188	6- 2	105
Methods of Measuring Water Oil Ratios—No. 189	6- 9	111
Application of Water and Oil Production Data to Oil-Field Economics—No. 190	6-16	145
Care and Treatment of Old Oil Wells to Maintain Maximum Productivity—No. 191	6-23	131
Testing Wells Clogged With Paraffin—No. 192	6-30	131
Treatment of Oil Wells to Remove Carbonate Scales—No. 193	7- 7	119
Removal of Drilling Mud From Well Faces—No. 194	7-14	137
Disposal of Oil-Field Waste Water—No. 195	7-21	149
Chemical Treatment for Oil-Field Water for Injection into the Ground—No. 196	7-28	157
Filtering Water Before Injecting Into an Oil Sand—No. 197	8- 4	99
Preventing Corrosion in Water-Disposal Systems—No. 198	8-11	123
Measuring Salt-Water Flow Rate—No. 199	8-18	157
Methods of Testing Salt Water for Injection Into Oil Sands—No. 200	8-25	145
Calcium Carbonate Precipitates in Water-Disposal Systems—No. 201	9- 1	83
Effect of Sulfate Reduction on Conditioning of Oil-Field Water—No. 202	9- 8	121
Tracing Flow of Fluids and Gases Beneath Ground—No. 203	9-29	141
Methods of Tracing Migration of Gas in Repressuring and Recycling Operations—No. 204	10- 6	119
Geology of Acidizing—No. 205	10-13	141
The Chemistry of Acidizing—No. 206	10-20	163
The Technique of Acidizing—No. 207	10-27	129
Results of Acidizing—No. 208	11- 3	123
Dissolving Mud Sheaths by Acidizing—No. 209	11-10	109
Tests for Acid Solubility; Spent Acid-Water—No. 210	11-17	295
Preparation and Testing of Concrete—No. 211	11-24	149
Construction of Concrete Foundations—No. 212	12- 1	103
Making Forms for Concrete and Setting Anchor Bolts—No. 213	12- 8	113
Staking Foundations and Setting Batter Boards—No. 214	12-15	129
Concrete—Miscellaneous Details—No. 215	12-22	93
Estimate Factors Increase Efficiency of Chart Computation—No. 216	12-29	323

EQUIPMENT (also see other headings involving specific types)

Methods of Reducing Capillary Penetration of Excess Water Around an Oil Field by Pumping	3-31	311
Plant-Built Sand Blasters and Dryer	4-28	116
Electronics—Its Application to Petroleum Technology—Part 1—Fabian R. Staley	5- 5	82
Prepacking Gravel Screens—F. B. Plummer	5- 5	119

	Date	Page
Automatic Tank-Battery Switching Method Saves Time, Mileage, and Gas Waste—Kenneth B. Barnes	5-19	112
Bending Device for Tubing and Small Pipe	5-26	122
Electronics—Its Application to Petroleum Technology —Part 2—Fabian R. Staley	5-26	123
Electronics—Its Application to Petroleum Technology —Part 3—Fabian R. Staley	6-16	120
Penetron Quickly Determines Steel Thickness--Also, Without Connection to Liquids, Finds Levels and Densities	6-30	106
Automatic Well Controls and Two-Stage Separation Have Quick Payout—Kenneth B. Barnes	7-14	107
FLOWING		
Automatic Well Controls and Two-Stage Separation Have Quick Payout—Kenneth B. Barnes	7-14	107
Significance of Declining Productivity Index (Abs.) —C. V. Millikan and Herbert Beardmore	9-29	123
Measuring Distribution of Liquids in Flowstring of a Gas-Condensate Well—C. K. Eilerts, R. V. Smith, and V. L. Barr	12-15	91
FLOW OF FLUIDS—Graphic Solutions of Design Problems (a series) by Paul Buthod and B. W. Whiteley		
1—Fluid Flow in Pipes	10-20	122
2—Friction Factors for Fluid Flow	10-27	104
3—Pressure Drop for Liquid Flow	11- 3	120
4—Viscosity of Petroleum Liquids	11-10	100
5—Resistance of Fittings	11-17	286
6—Thermodynamics of Gas Flow	11-24	130
7—Reynolds Number for Gases	12- 1	76
8—Isothermal Flow of Gases	12- 8	92
9—Flow of Gases in Horizontal Pipes	12-15	112
10—Flow of Gases in Vertical Pipes	12-22	70
11—Vertical Flow of Gases	12-29	305
GAGING (see articles under Gathering)		
GAS (see headings in "NATURAL GAS" section)		
GAS LIFT		
Significance of Declining Productivity Index (Abs.) —C. V. Millikan and Herbert Beardmore	9-29	123
Closed System of Intermittent Gas Lift Applied in Single-Well Operation—E. H. Short, Jr.	10-27	113
GATHERING; LINES; SYSTEMS; METERING		
Crude Evaporation Losses	1-20	87
Alignment Chart for Convenient Calculation of Pipe-Line Storage Capacity—W. D. Parkes	3-17	114
Gas-Actuated "Jeep" Pump is Automatic in Operation—Neil Williams	3-24	77
Alignment Chart for Calculating Volume of Gas Lost When Blowing Line Section Through Open End—W. D. Parkes	3-24	81
Lake St. John Field Served by Central High-Pressure Gas System—Neil Williams	4- 7	74
Scraper Barge Performs Triple Function in Gulf's Quarantine Bay Operations—E. H. Short, Jr.	4-28	114
Alignment Chart for Correcting Natural Gas for Specific Gravity and Temperature—W. D. Parkes	4-28	122
Gaging Tanks and Measuring Rate of Flow of Oil Wells	5-12	137
Fully Equipped Floating Tank Batteries Used in Coastal Louisiana Operations—E. H. Short, Jr.	5-26	120
Substantially Built Pipe-Line Tool	6- 2	80
Alignment Chart for Pipe-Line Tests—W. D. Parkes	6- 9	103
Methods of Measuring Water Oil Ratios—F. B. Plummer	6- 9	111
Alignment Chart for Natural Gas Pipe Line Operations—W. D. Parkes	6-16	131
Pressure-Maintenance Project at Haynesville Utilizes Advantages of Central Gathering System—E. H. Short, Jr.	6-23	93
Automatic Well Controls and Two-Stage Separation Have Quick Payout—Kenneth B. Barnes	7-14	107
Cement-Lined Pipe Data	7-14	116
Rustless Pipe for War and Peace—Frederick Squires	8- 4	70
San Miguelfto is Outstanding Example of Modern Oil-Field Engineering—Kenneth B. Barnes	8-11	84
Measuring Salt-Water Flow Rate—F. B. Plummer	8-18	157
Rotary Pumps in Gathering-Line Service—J. F. Nickell	9-22	255
Wells Slanted Out 3,700 Feet Tap Under-Ocean Pool Kenneth B. Barnes	11- 3	82
Close Control of Gas Pressure Achieved in Carthage Field Metering System—Neil Williams	11- 3	91
Construction Program Under Way in Iraq Will Triple Present Crude Output—C. O. Willson	11-10	60
Unitized Equipment for Pipe-Line Gathering Service —William Law	11-17	290
Application of Diethylene Glycol-Water Solution for Dehydration of Natural Gas—N. K. Senatoroff	12-15	98
GRAVITY DRAINAGE		
Displacement of Oil by Gravity Relative to Gas—Park J. Jones	4-21	124
INTERSTITIAL WATER		
Characteristics of Reservoirs—Park J. Jones	1- 6	49
MAINTENANCE (see specific subjects involved)		
METERING (grouped with articles listed under Gathering)		
MUDS (see this heading under "DRILLING")		
OIL SHALE		
Site Chosen for Oil-Shale Demonstration Plant	3-24	110
Government Lets Contract for Oil-Shale Laboratory	4-28	161
Plans for Oil-Shale Plant Taking Definite Shape	6- 2	109
Contract Let for Housing Oil-Shale Project at Rifle, Colo. Plant	8- 4	115
Cornerstone for Oil-Shale Research Laboratory Laid	8-25	151
OPERATING IDEAS (also see listings under specific subjects)		
Butane Vaporizer Uses Engine Radiator Water	1-13	62
Concrete Base for Drilling and Completed Wells	1-13	62
Quick Connections for Portable Equipment	1-13	62
Use of Simple Fixture Saves Time in Reseating Small Globe Valve	5-19	144
PACKERS (see Completions)		
PARAFFIN		
Hot Oil From Portable Heater Recirculated to Control Paraffin—Frank B. Taylor	4-14	134
Scraper Barge Performs Triple Function in Gulf's Quarantine Bay Operations—E. H. Short, Jr.	4-28	114
Treating Wells Clogged With Paraffin—F. B. Plummer	6-30	131
PERFORATING (see heading on Completion under "DRILLING"; "PRODUCTION")		
PLUG-BACK WORK		
Plastics Now Adapted to Remedial Work in Kansas Wells	4-28	117
PRESSURE MAINTENANCE		
West Edmond Conditions Show Possibilities of Increasing Recovery by Pressure Maintenance—Kenneth B. Barnes	3- 3	44
Erath Cycling Operation	3-17	65
Carter Plans Conservation Project in Magnolia Field	3-24	63
Arkansas is Proving Ground for Many New Practices Over the Past Eight Years—Kenneth B. Barnes	4-21	102
Haynesville Plant Dedication Scheduled for June 1	5-19	106
Haynesville Plant Recovers Production From Entire Field—Arch L. Foster	6-23	86
Pressure-Maintenance Project at Haynesville Utilizes Advantages of Central Gathering System—E. H. Short, Jr.	6-23	93
Maljamar Cooperative Repressuring Project Covers Many Operational Phases—Kenneth B. Barnes	6-30	90
Maljamar Repressuring Plant Expanded in Logical Steps—Kenneth B. Barnes	7- 7	104
Pressure-Maintenance Plants Are Proposed for Venezuela	7-21	98
Helium Playing "Sleuth" in Getting Oil and Gas Facts	7-28	162
San Miguelito is Outstanding Example of Modern Oil-Field Engineering—Kenneth B. Barnes	8-11	84
Paloma Unit—An Advanced Oil, Gas, and Products Producing Operation—Part 1—Kenneth B. Barnes	8-18	112
Paloma Unit—An Advanced Oil, Gas, and Products Producing Operation—Part 2—Kenneth B. Barnes	8-25	117
Paloma Unit—An Advanced Oil, Gas, and Products Producing Operation—Part 3—Kenneth B. Barnes	9- 8	97
Salt-Water Injection for Pressure-Maintenance in East Hackberry Field, Louisiana—M. L. Euwer	9-29	100
Five Fields With 51 Wells in Iran Produce Total of 365,000 Bbl. of Crude Daily—C. O. Willson	10- 6	74
Bahrein Island Produces 20,000 Bbl. and Refines 70,000 Bbl. per Day—C. O. Willson	10-20	110
Bahrein Concession Development Based on Maximum Recovery by Natural Flow—C. O. Willson	10-27	98
Helium as a Tracer in Injected Gas (A.I.M.E. Abs.)—G. P. Shea	11- 3	110
Pressure Maintenance by Water Injection, Midway Field, Arkansas—William L. Horner	11-17	185
Oklahoma at Important Threshold With New Deep Pools—Kenneth B. Barnes	12- 8	76
Process Improvements Mark Design and Operation of Abercrombie Plant	12-15	88
Modern Pressure-Maintenance Plants Being Built in Eastern Venezuela—Fabian R. Staley	12-29	276
Water Invasion Controlled by Gas Injection in Bahrein Island Operations	12-29	286
PRODUCTION MECHANICS, Oil, Condensate & Natural Gas (continuation of a series) by Park J. Jones		
10—Characteristics of Reservoirs	1- 6	49
11—Composition and Physical Constants of Hydrocarbons	1-13	64
12—Molal, Weight, and Volume Composition	1-20	64
13—The Volume per Thousand Cubic Feet of Gas	1-27	263
14—The Volume Factor per Barrel of Condensate	2- 3	51
15—The Volume Factor per Barrel of Oil	2-10	99

	Date	Page
16—Computation of Volume Factors for Liquids	2-17	99
17—Application of Equilibrium Constants	2-24	140
18—Viscosity of Reservoir Liquids and Gases	3- 3	53
19—Application of Darcy's Law	3-10	71
20—Displacement of Oil by Water From a Point	3-17	107
21—Examples on Displacement of Oil and Water	3-24	71
22—Displacement of Oil by Gas From a Point	4- 7	91
23—Examples on Displacement of Oil by Gas	4-14	125
24—Displacement of Oil by Gravity Relative to Gas	4-21	124
25—Displacement of Water by Gravity Relative to Oil and Gas	4-28	126
26—Oil Recovery by Expansion, No Primary Gas Cap	5- 5	103
27—Oil Recovery by Expansion With Primary Gas Cap	5-12	124
28—Recovery of Condensate by Cycling	5-19	128
29—Displacement Factors	5-26	139
30—Invasion Factors and Patterns	6- 2	97

(Parts 1-9 of this series appeared consecutively in the Journal between November 4 and December 30, 1944, the titles being:

1—Elements of Production Mechanics
2—Porosity, Number of Voids, and Surface Area
3—Properties of Water Found in Reservoirs
4—Interstitial Water, Gravity, and Capillary Pressure
5—Permeability, Type of Pay, and Interstitial Water
6—Core Data as a Production Tool
7—Resistivity of Pay and Nonpay
8—Characteristics of Electric Logs
9—Application of Electric-Log Data

PUMPING

Examples of Sucker-Rod Pumping Below 8,000 Ft.—Paul Reed	2-24	139
Industry Expects to Put 7,000 Wells on Pump in Second Half—H. Stanley Norman	7-28	120
Power-Driven Tong is New Tool for Uniform, Efficient Tubing Jobs—Kenneth B. Barnes	7-28	146
Significance of Declining Productivity Index—C. V. Millikan and Herbert Beardmore	9-29	123
Wells Slanted Out 3,700 Feet Tap Under-Ocean Pool—Kenneth B. Barnes	11-3	82
Central Electric Power Plant Solves Pumping Problem at Gilbertown—Neil Williams	11-17	276

RATE OF PRODUCTION—The Optimum Rate of Production of Oil, Condensate, and Natural Gas (a series) by Park J. Jones

1—Elements of Optimum Producing Rates	9- 1	50
2—Distribution of Reserve in Reservoirs	9- 8	103
3—The MER for Displacement of Oil by Water Above Saturation Pressure	9-15	81
4—The MER for Displacement of Oil by Gas at Negligible Pressure	9-22	317
5—Well Producing Capacity and Reserve	9-29	111
6—Well-Producing Capacity and Pressure	10-6	95
7—The Reserve for Displacement of Oil by Gas at Declining Pressures	10-13	119
8—The Reserve for Displacement of Oil by Water at Declining Pressures	10-20	147
9—Oil Reserve vs. Producing and Operation Methods	10-27	109
10—Condensate Reserve by Cycling	11- 3	94
11—Uniform Production and Depletion Rates	11-10	91
12—The Present Value of a Reserve	11-17	279
13—The Period of Development	11-24	102
14—Reserve Recoverable Before Production Starts Declining	12- 1	87
15—Production Characteristics for Uniform Depletion Rates	12- 8	105
16—Increasing Rates of Depletion	12-15	116
17—Production Characteristics for Increasing Rates of Depletion	12-22	63
18—Rate of Oil Production for Decreasing Depletion Rates	12-29	300

RECONDITIONING (also see this heading under "DRILLING")

Oil-Injection Method of Increasing Production in Well Producing Oil and Water—F. B. Plummer	4-14	141
Plastics Now Adapted to Remedial Work in Kansas Wells	4-28	117
Unusual Measures Are Employed in Workover Job—Charles J. Deegan	5-26	152
Treatment of Oil Wells to Remove Carbonate Scales—F. B. Plummer	7- 7	119
Removal of Drilling Mud From Well Faces—F. B. Plummer	7-14	137
Power-Driven Tong is New Tool for Uniform, Efficient Tubing Jobs—Kenneth B. Barnes	7-28	146
Horizontal Drilling Restores Well Which Had Been Abandoned 17 Years—L. P. Stockman	10- 6	89

REPRESSURING

Mammoth Gas-Repressuring Project to Start in West Pampa Pool—Kenneth B. Barnes	2-10	74
Proposed Exploratory Work Would Help Determine Extent of Elk Hills Reserve—L. P. Stockman	2-24	157
Resaturate While Repressuring, a Wartime Suggestion—Frederick Squires	3-10	67
Practical, Economic Method of Reconditioning Gas for Injection—Frank B. Taylor	3-17	104
Displacement of Oil by Gas From a Point—Park J. Jones	4- 7	91
Examples on Displacement of Oil by Gas—Park J. Jones	4-14	125
Special Technique Promises to Change Future Lime-Completion Practices (Includes Haynesville Field and Production Data)—Paul Reed	5-19	137
Displacement Factors—Park J. Jones	5-26	139
Invasion Factors and Patterns—Park J. Jones	6- 2	97
Turner Valley Field Gets First Gas-Repressuring Program—J. A. McCutchin	6- 9	89
Maljamar Cooperative Repressuring Project Covers Many Operational Phases—Kenneth B. Barnes	6-30	90
Maljamar Repressuring Plant Expanded in Logical Steps—Kenneth B. Barnes	7- 7	104
Helium Playing "Sleuth" in Getting Oil and Gas Facts	7-28	162
Tracing Flow of Fluids and Gases Beneath Ground	9-29	141
Methods of Tracing Migration of Gas in Repressuring and Recycling Operations	10- 6	119
Over-All Picture of Work Accomplished at Elk Hills (A.I.M.E. Abs.)—John Domerco	11- 3	109
Helium as a Tracer in Injected Gas (A.I.M.E. Abs.)—G. P. Shea	11- 3	110
Inflammability of Natural Gas: Effect of Pressure Upon the Limits—G. W. Jones and R. E. Kennedy	11-10	78
Selective Plugging by Smokes in Air-Gas Drive (Abs.)—R. F. Nielsen and S. T. Yuster	11-17	167
Predictions of Behavior in Air-Gas Drive (Abs.)—R. J. Day and S. T. Yuster	11-17	167

RESERVES

Cost of Replacing Reserves Included in OPA Study—Henry D. Ralph	1-27	160
Comparison of Oil Reserves by years, 1937-1944, Texas, Calif., Ill., Kan., La., N. Mex., Okla., Wyo., and other States	1-27	175
Natural Gas Reserves, by States	1-27	179
Analysis of 1945 Reserves—Charles J. Deegan	1-27	183
Reserves and Production, by years, 1937-1944	1-27	183
Proven Reserves, Total U. S., by Individual States as of Jan. 1, 1945, Including 1944 Discoveries, Extensions, Revisions, Production (Compiled by The Oil and Gas Journal)	1-27	184
New (1944) Oil Reserves, Proven Acreage and Formation Thickness, by fields (with maps showing 1944 discoveries and extensions):		
Alabama	1-27	192
Arkansas	1-27	188
California	1-27	185
Colorado	1-27	185
Illinois	1-27	188
Indiana	1-27	188
Kansas	1-27	189
Kentucky, Western	1-27	188
Louisiana, North	1-27	188
Louisiana, South	1-27	192
Michigan	1-27	191
Mississippi	1-27	191
Montana	1-27	186
New Mexico, Southeast	1-27	186
Ohio	1-27	192
Oklahoma	1-27	189
Texas:		
East	1-27	187
Gulf Coast, Lower	1-27	190
Gulf Coast, Upper	1-27	191
North and West Central	1-27	187
South	1-27	190
South Central	1-27	190
West	1-27	186
Wyoming	1-27	185
Annual (1944) and Cumulative Production (Jan. 1, 1945), Remaining Reserves, No. of Wells, by fields (Compiled by The Oil and Gas Journal):		
Alabama	1-27	202
Arkansas	1-27	202
California:		
Coastal District	1-27	193
Los Angeles Basin	1-27	193
San Joaquin Valley	1-27	193
Illinois	1-27	209
Kansas	1-27	205
Louisiana, North	1-27	201
Louisiana, South	1-27	201
Michigan	1-27	209
Mississippi	1-27	202
New Mexico	1-27	194
Oklahoma	1-27	202

	Date	Page
Rocky Mountain Area:		
Colorado	1-27	193
Montana	1-27	193
Wyoming	1-27	194
Texas:		
East	1-27	197
Gulf Coast, Lower	1-27	198
Gulf Coast, Upper	1-27	198
North Central	1-27	197
Panhandle	1-27	194
South	1-27	197
South Central	1-27	197
West	1-27	194
West Central	1-27	197
Proposed Exploratory Work Would Help Determine Extent of Elk Hills Reserve—L. P. Stockman	2-24	157
A.P.I. Tally of Petroleum Reserves Shows 20,453,231,000 Bbl., Two Billion Gain	3- 3	48
Important Developments in Rockies Center Around Four Great Basins—Charles J. Deegan	3-17	58
California A.P.I. Meet Hears Discussion of Demand, Reserves—L. P. Stockman	4- 7	64
Arkansas is Proving Ground for Many New Practices Over the Past Eight Years—Kenneth B. Barnes	4-21	102
Gas Reserves at Top, Kelly Tells Measurement Field	4-28	163
Creole's Production Increased 44 Per Cent	5-12	86
Bradford Reserves Judged at 80-90 Million Barrels	5-19	98
Stripper Reserves Are 8.16 Per Cent of Total	5-19	100
Carthage Area Holds Promise of Becoming World's Largest Gas Reserve—Neil Williams	5-19	102
Fullerton Pool is Guidepost in Developing Clear Fork and Devonian Reserves—Kenneth B. Barnes	6- 2	69
States Show Vast Progress in Natural-Gas Conservation	6-16	92
Pew Scores Idea of Creating National Petroleum Reserve	6-23	74
The Nation's Reserves of Natural Gas—E. DeGolyer	6-23	76
DeGolyer Debunks Contention Gas Reserves Are Inadequate	9-22	161
A.G.A. Has Committee on Natural-Gas Reserves	10-20	167
World Oil Supply—William B. Heroy	10-27	89
New Zone in Wilmington May Increase Reserve 25,000,000 Bbl.—L. P. Stockman	11- 3	62
Petroleum Reserves of the World, 50 Billion Barrels	12-29	172
Division of Proved Reserves, All Countries	12-29	173
Reserves of Middle East (Table)	12-29	189
Deep Potentialities to Be Tested at Amana, Venezuela	12-29	293
RESERVOIR STUDIES		
Characteristics of Reservoirs—Park J. Jones	1- 6	49
Bottom-Hole Pressure Data in Conservation and Proration Work	1- 6	69
Application of Radial Permeability to Oil-Reservoir Problems	1-13	89
Application of Radial-Permeability Computations to Oil Reservoir Problems	1-20	85
Examples of Fitting Production Program to Pool Conditions in Illinois Basin—Kenneth B. Barnes	2- 3	42
The Volume Factor per Barrel of Oil—Park J. Jones	2-10	99
Exploration Aided by Early Pressure Measurements—J. A. Heerin	2-17	91
Computation of Volume Factors for Liquids—Park J. Jones	2-17	99
Effect of Mixtures of Oil and Water on Production of Oil	2-17	119
Application of Equilibrium Constants—Park J. Jones	2-24	140
West Edmond Conditions Show Possibilities of Increasing Recovery by Pressure Maintenance—Kenneth B. Barnes	3- 3	44
Viscosity of Reservoir Liquids and Gases—Park J. Jones	3- 3	53
Erath Cycling Operation	3-17	65
Phase Equilibria in the Systems Propylene-Acetylene and Propane-Acetylene—J. Lloyd McCurdy and Donald L. Katz	3-17	102
Displacement of Oil by Gas From a Point—Park J. Jones	4- 7	91
Arkansas is Proving Ground for Many New Practices Over the Past Eight Years—Kenneth B. Barnes	4-21	102
Displacement of Water by Gravity Relative to Oil and Gas—Park J. Jones	4-28	126
District 3 Fields Undamaged by Record Wartime Withdrawals of Crude—Charles J. Deegan	5- 5	72
Oil Recovery by Expansion, No Primary Gas Cap—Park J. Jones	5- 5	103
Oil Recovery by Expansion With Primary Gas Cap—Park J. Jones	5-12	124
Carthage Area Holds Promise of Becoming World's Largest Gas Reserve—Neil Williams	5-19	102
Displacement Factors—Park J. Jones	5-26	139
Fullerton Pool is Guidepost in Developing Clear Fork and Devonian Reserves—Kenneth B. Barnes	6- 2	69
Maljamar Cooperative Repressuring Project Covers Many Operational Phases—Kenneth B. Barnes	6-30	90
Production of 200,000 Bbl. Above MER Must Remain, PIWC Told—Henry D. Ralph	7-21	90
Paloma Unit—An Advanced Oil, Gas, and Products Producing Operation—Kenneth B. Barnes	8-18	112
Significance of Declining Productivity Index (Abs.) C. V. Millikan and Herbert Beardmore	9-29	123
Five Fields With 51 Wells in Iran Produce Total of 365,000 Bbl. of Crude Daily—C. O. Willson	10- 6	74
Conroe Field Presents Good Example of Benefits of Conservation Principles—Charles J. Deegan	10- 6	100
The Electrolytic Model and Its Application to the Study of Recovery Problems (A.I.M.E. Abs.)—Holbrook G. Botset	10-13	94
Bahrein Island Produces 20,000 Bbl. and Refines 70,000 Bbl. per Day—C. O. Willson	10-20	110
Precision in Bottom-Hole-Pressure Measurement (A.I.M.E. Abs.)—E. R. Brownscombe and D. R. Conlon	10-20	160
Saudi Arabian Petroleum Operations Are Rapidly Reaching Major Proportions—C. O. Willson	11- 3	70
Electrical Device Forecasts Future of Oil Fields	11- 3	100
The Viscosity of Air, Water, Natural Gas, Crude Oil and Gas-Saturated Crude Oil at Oil Field Temperatures and Pressures (A.I.M.E. Abs.)—Carlton Beal	11- 3	110
Construction Program Under Way in Iran Will Triple Present Crude Output—C. O. Willson	11-10	60
Research Unit Planned by Shell to Cost $1,000,000	11-10	71
Wax Saturation in Oil Sands (Abs.)—J. C. Calhoun and S. T. Yuster	11-17	167
Rangely, One-Time Shallow Field, Now Rocky Mountain's Most Active Area—C. R. Thomas	11-24	90
Lake Creek Cycling Project Example of Applied Engineering Technique—E. H. Short, Jr.	12- 1	64
Determining Weighted Average Bottom-Hole Pressure in East Texas Field—L. J. Meyer	12- 1	67
Only Production in Egypt Comes From Two Fields on Suez Gulf Shores—C. O. Willson	12- 8	62
Oklahoma at Important Threshold With New Deep Pools —Kenneth B. Barnes	12- 8	76
Plans Under Way to Make Qatar a Major Source of Petroleum—C. O. Willson	12-15	80
Difficult Drilling and High Costs Attend Development of Rangely Field—Neil Williams	12-22	44
Schist Production is New Development at Edison—L. P. Stockman	12-29	165
Water Invasion Controlled by Gas Injection in Bahrein Island Operations	12-29	286
SAFETY		
Scraper Barge Performs Triple Function in Gulf's Quarantine Bay Operations—E. H. Short, Jr.	4-28	114
SECONDARY RECOVERY (more than one type treated)		
Oil Sands, Ltd., Acquires Tar Sand Plant	6-23	141
Secondary Recovery in Nowata-Claggett Field	6-30	127
Secondary Recovery From Lime Pool, Basis of U. S. Bureau of Mines Report	8-18	110
SEPARATION (Oil and Gas)		
Automatic Tank-Battery Switching Method Saves Time, Mileage, and Gas Waste—Kenneth B. Barnes	5-19	112
Pressure-Maintenance Project at Haynesville Utilizes Advantages of Central Gathering System—E. H. Short, Jr.	6-23	93
Automatic Well Controls and Two-Stage Separation Have Quick Payout—Kenneth B. Barnes	7-14	107
San Miguelito is Outstanding Example of Modern Oil-Field Engineering—Kenneth B. Barnes	8-11	84
Five Fields With 51 Wells in Iran Produce Total of 365,000 Bbl. of Crude Daily—C. O. Willson	10- 6	74
Saudi Arabian Petroleum Operations Are Rapidly Reaching Major Proportions—C. O. Willson	11- 3	70
Close Control of Gas Pressure Achieved in Carthage Field Metering System—Neil Williams	11- 3	91
Construction Program Under Way in Iraq Will Triple Present Crude Output—C. O. Willson	11-10	60
SHOOTING		
Field Effective Permeabilities and Shot-Well Radii (Abs.)—S. T. Yuster	11-17	167
SPACING, WELL		
Examples of Fitting Production Program to Pool Conditions in Illinois Basin—Kenneth B. Barnes	2- 3	42
California Spacing Rules Are Relaxed to Secure Crude	8- 4	54
Federal Well-Spacing Control Eliminated by PAW	9- 1	38
Mississippi Issues State Well-Spacing Regulations	9- 8	84
Well Spacing Important But Not Only Factor in Maximum Recovery	11-17	154
Oklahoma at Important Threshold With New Deep Pools—Kenneth B. Barnes	12- 8	76
STATISTICS, PRODUCTION		
Analysis of Oil Production Statistics for 1944	1-27	174
U. S. Oil Production, by years, 1937 through 1944, by States	1-27	176

	Date	Page
Daily Average Crude-Oil Production in U. S. and Number of Producing Wells by years, 1937 through 1944	1-27	176
Crude Demand up 6.1 Per Cent; Production Balances Needs	2-17	82
PAW March Production Rates in Barrels per Calendar Day	3-10	48
New All-Time-Record Production Rate of 5,198,480 Bbl. Certified	4-28	98
West Texas Production at Maximum Efficient Capacity for Second Month	4-28	98
Output of Natural Gasoline Makes New High Record	5- 5	122
June Production Rate Lowered 6,380 Bbl. From All-Time High	6- 2	54
PAW Calls for All-Time High in Daily Oil Production	6-30	80
Another Record Production Rate Certified to Oil States	7-28	109
Production Increases 56,440,000 Bbl.—Charles J. Deegan	7-28	124
Output of Natural Gasoline Continues to Increase	7-28	162
Production Rate for September Decreased by 327,930 Bbl.	9- 1	43
Decline Registered in June Output of Natural Gasoline	9- 1	101
Further Drop Registered in Natural-Gasoline Output	10- 6	126
Natural-Gasoline Output Continues Its Decline (August & July figures)	11- 3	129
Petroleum Production and Refinery Runs (World—Excluding Axis and Russian Areas)	12-29	170
Increase in Petroleum Production and Refinery Runs (United States vs. Foreign)	12-29	171
Petroleum Reserves of the World, 50 Billion Barrels	12-29	172
World Crude-Oil Production, 1900-1945	12-29	176
Increase in Available Foreign Production	12-29	177
Estimated Postwar Petroleum Production in Comparison With Wartime Production	12-29	177
Production—Countries of Eastern Hemisphere	12-29	178
Production—Countries of Western Hemisphere	12-29	178

SUCKER RODS (see Pumping)

TANKAGE, STORAGE

Automatic Tank-Battery Switching Method Saves Time, Mileage, and Gas Waste—Kenneth B. Barnes	5-19	112
Method of Computing Gage Tables From Tank Measurements—F. B. Plummer	5-19	149
Fully Equipped Floating Tank Batteries Used in Coastal Louisiana Operations—E. H. Short, Jr.	5-26	120
Corrections in Measurements of Crude-Oil Volumes —F. B. Plummer	5-26	161
Sulfide Corrosion Complicates Tank-Cleaning Operation in Tampico Refinery—Fabian R. Staley	12-29	250

TREATING OF OILS

Treatment of Heavy Oil Emulsions in Mississippi Field Presents Problems—Neil Williams	2- 3	59
Wetting Agents	2-24	153
Gas-Actuated "Jeep" Pump is Automatic in Operation—Neil Williams	3-24	77
Fully Equipped Floating Tank Batteries Used in Coastal Louisiana Operations—E. H. Short, Jr.	5-26	120

UNITIZATION

Erath Cycling Operation	3-17	65
Revised Oklahoma Unitization Bill Ready for House Action	3-24	55
Oklahoma House Passes Unitization Bill	4-14	92
Oklahoma Operators Acclaim Unitization Law as Forward Step	4-28	100
Oklahoma at Important Threshold With New Deep Pools—Kenneth B. Barnes	12- 8	76

WATER DISPOSAL

Utilization of Salt Water in Illinois Oil Fields—Samuel F. Peterson	1-13	69
Displacement of Oil by Water From a Point—Park J. Jones	3-17	107
West Edmond Pool to Have Water Disposal Operation	4-28	107
Disposal of Oil-Field Waste Water—F. B. Plummer	7-21	149
Chemical Treatment for Oil-Field Water for Injection into the Ground—F. B. Plummer	7-28	157
Filtering Water Before Injecting Into an Oil Sand—F. B. Plummer	8- 4	99
Preventing Corrosion in Water-Disposal Systems—F. B. Plummer	8-11	123
Methods of Testing Salt Water for Injecting Into Oil Sands—F. B. Plummer	8-25	145
Calcium Carbonate Precipitates in Water-Disposal Systems—F. B. Plummer	9- 1	83
Effect of Sulfate Reduction on Conditioning of Oil-Field Water—F. B. Plummer	9-8	121
Periodic Tests Insure Injection-Water Quality—Joe R. Wright	9-15	78
Salt-Water Injection for Pressure-Maintenance in East Hackberry Field, Louisiana—M. L. Euwer	9-29	100
Injection of Water Into Underground Reservoirs in Michigan—W. E. Schoeneck	11-17	193

WATER FLOODING

Response of Limestone Pool to Flooding Reported by Bureau	2-10	68
Water-Flood Operations Automatically Controlled in Eastern Kansas—Frank B. Taylor	2-17	88
Wetting Agents—F. B. Plummer	2-24	153
Methods of Demonstrating and Measuring Surface Tensions of Water and Oil—F. B. Plummer	3- 3	85
Methods of Measuring Interfacial Tensions—F. B. Plummer	3-10	81
Application of Surface Chemistry to Oil-Production Problems—F. B. Plummer	3-17	127
Examples on Displacement of Oil and Water—Park J. Jones	3-24	71
Arkansas is Proving Ground for Many New Practices Over the Past Eight Years—Kenneth B. Barnes	4-21	102
West Edmond Pool to Have Water-Flooding Operation	4-28	107
Displacement of Water by Gravity Relative to Oil and Gas—Park J. Jones	4-28	126
Invasion Factors and Patterns—Park J. Jones	6- 2	97
Filtering Water Before Injecting Into an Oil Sand—F. B. Plummer	8- 4	99
Water Injection in the Chatham Field, Medina County, Ohio—Richard B. Lyon and Jack Cashell	9- 1	58
Periodic Tests Insure Injection-Water Quality—Joe R. Wright	9-15	78
Salt-Water Injection for Pressure-Maintenance in East Hackberry Field, Louisiana—M. L. Euwer	9-29	100
Tracing Flow of Fluids and Gases Beneath Ground—F. B. Plummer	9-29	141
The Electrolytic Model and Its Application to the Study of Recovery Problems (A.I.M.E. Abs.)—Holbrook G. Botset	10-13	94
Factors Influencing the Plugging Characteristics of an Oil Well Injection Water (A.I.M.E. Abs.)—William F. Cerini	11- 3	110
Field Effective Permeabilities and Shot-Well Radii (Abs.)—S. T. Yuster	11-17	167
Graphical Prediction of Water Flooding Intakes (Abs.)—S. T. Yuster	11-17	167
Pressure Maintenance by Water Injection, Midway Field, Arkansas—William L. Horner	11-17	185
Injection of Water Into Underground Reservoirs in Michigan—W. E. Schoeneck	11-17	193
Behavior of Water-Ihput Wells—Parke A. Dickey and Kurt H. Andresen	11-17	205
Interactions Between Interstitial and Injected Water —A Review—A. J. W. Headlee	11-17	219
Water Invasion Controlled by Gas Injection in Bahrein Island Operations	12-29	286

WATER SUPPLIES

Underground Water in Oil Fields—F. B. Plummer	1-27	271
Identifying Waters Without Complete Analysis—F. B. Plummer	2- 3	69
Identification of Oil-Field Waters by Means of pH Determination—F. B. Plummer	2-10	117
Scale-Forming and Corrosive Tendencies of Water Predicted by Rapid Methods—Joe R. Wright	6-23	99
Stability Index Judges Cooling Water—Joe R. Wright	7-14	112

Refining

	Date	Page
ABSORPTION		
Multistage Weathering of Saturated Absorption Oil—Henry N. Wade	3-10	57
Increasing Propane Recovery in Existing Natural-Gasoline Absorption Plants—F. W. Bell	5-19	114
ADDITIVES		
Chemical Cocktails Impart New Properties to Lubes	1-20	96
ALKYLATION		
HF Alkylation Process	3-31	183
Sulfuric Acid Alkylation Process	3-31	184
Butane Isomerization Process	3-31	197
Catalysts Employed in Hydrocarbon Alkylation Reactions—Arch L. Foster	9- 8	89
Products of Industry's Largest Manufacturing Unit (Anglo-Iranian Oil Co., Ltd., Persian Gulf)—C. O. Willson	10-13	86
Cost Factors in Postwar Alkylation—Arch L. Foster	10-27	96
Numerous Improvements in HF Alkylation Will Cut Costs and Reduce Losses—W. B. Shanley and H. J. Nebeck	12- 1	94
ALLOYS (see Metallurgy)		
ASPHALT		
Work on Asphalt Plant at Big Sandy Started	8- 4	114
ANALYSIS, METHODS OF (also see Laboratory)		
Determination of Gum Content of Diesel Fuels	1-13	84
Laboratory Salt Control	2-10	119
Determination of the Composition of Commercial Isobutane—J. W. Tooke and R. P. Roberts	4- 7	98
Automatic Distillation Unit Shows Exceptional Efficiency	4-21	127
Refiner Must Know Fuel Components, Technologist Avers (Wichita Meeting)—Arch L. Foster	5-26	117
Bureau of Mines Method Detects Uranium	10-13	127
AVIATION (see Fuels, Aviation; Lubricants)		
BUTADIENE (also see Rubber, Synthetic)		
Perco Dehydrogenation Process	3-31	211
Lion Oil Boasts Most Efficient Thermal Butadiene Unit—W. M. Wilson	3-31	241
Butadiene Plants—Completed and Operating, List of	3-31	293
New Methods of Producing Butadiene Announced	6-16	151
University of Wisconsin Butadiene Plant Affording Important Help	6-23	141
Petroleum to Supply All Butadiene Next Year—Henry D. Ralph	12-15	70
BUTYLENES (also see Butadiene; and Rubber, Synthetic)		
Butyl Plants—Completed and Operating, List of	3-31	293
CATALYSIS, CATALYSTS (also see Cracking, Catalytic)		
Straight-Run Gasoline Desulfurized Catalytically—R. B. Tuttle	3-24	85
B. of M. Making 10 Gal. of Synthetic Gasoline Daily	3-24	111
Perco Catalytic Desulfurization Process	3-31	194
Phosphoric Acid Polymerization Process	3-31	199
Isomate Process	3-31	213
T.C.C. Announces Liquid Processing Using Pelleted Clay or Beaded Catalyst—T. P. Simpson	5-12	88
Aluminum Chloride Produces 80-Octane Fuel	5-12	147
Glass for Hydrofluoric Acid Alkylation Plants	7-14	112
Oxidation of Paraffins—Part 1—Dr. Ernest Stossel	7-21	130
Operating Report on Gas-Turbine on Catalyst Regeneration in Sun Oil Co. Refineries—Arthur E. Pew, Jr.	8-11	118
Oxidation of Paraffins—Part 2—Dr. Ernest Stossel	8-18	145
Refining Technology Goes Catalytic—Arch L. Foster	8-25	133
Oxidation of Paraffins—Part 3—Dr. Ernest Stossel	9- 1	69
Catalysts Employed in Hydrocarbon Alkylation Reactions—Arch L. Foster	9- 8	89
Polymerization and Isomerization Are Effective in Motor-Fuel Manufacture—Arch L. Foster	9-29	103
Hydrogenation-Dehydrogenation, Aromatization Catalysts Important to Refining Technology—Arch L. Foster	10-13	109
Liquid-Charge Technique in T.C.C. Processing—T. R. Simpson, S. C. Eastwood and H. G. Shimp	11-24	119
Regeneration of Caustic Solutions for Gasoline Treating by Catalytic Air Oxidation—Donald C. Bond	12- 8	83
Spherical Catalyst May Reduce Gasoline Cost	12- 8	122
Olefins Used to Make Huge Chemical Tonnage in 1945, A.I.Ch.E. Meeting Told—Arch L. Foster	12-29	159
CHEMISTRY, CHEMICALS		
Petroleum Industry Has Become Largest Producer of Chemicals	2-10	66
Toluene Plants—Completed and Operating, List of	3-31	293
New Process for Making Ethyl Chloride Announced	4-21	150
Olefin Production by Thermal Cracking of Isobutane—Philip M. Arnold	7- 7	87
Physical Properties of Light Hydrocarbons—M. L. Smith and G. H. Hanson	7-14	119
Shell Now Producing Allyl Chloride and Allyl Alcohol	7-14	142
Oxidation of Paraffins—Part 1—Dr. Ernest Stossel	7-21	130
The Acrylic Resins—Derivatives of Petroleum—John D. Constance	6-23	111
Revised Table of Physical Constants Now Available	6-30	132
Petroleum Enters Into Production of Almost All Modern Articles	8- 4	56
Indiana Standard Organizes New Chemical Products Department	8- 4	60
Lion Changes Name and Enters Wider Field	8- 4	114
Chemicals Made on Large Scale From Natural Gas	8- 4	117
Isoprene-Recovery Plant Planned by Shell Union	8-11	128
Oxidation of Paraffins—Part 2—Dr. Ernest Stossel	8-18	145
Direct Amination Process Developed by Sinclair	8-25	150
Oxidation of Paraffins—Part 3—Dr. Ernest Stossel	9- 1	69
The Amazing New Chemical Family—The Silicones—Arch L. Foster	10- 6	86
Elimination of Air From Process Water in Generation of Acetylene—J. D. Constance	10- 6	111
Some Future Products From Synthesis of Petroleum and Natural Gas (A.I.M.E. Abs.)—H. P. Hohenadel	10-13	94
N.G.A.A. Standard Table of Physical Constants for Paraffin Hydrocarbons	10-13	115
Petroleum vs. Plutonium—Clark Goodman	11-17	227
Standard of California Operating Chemical Plant	12-22	102
Polystyrene on Petroleum Horizon—J. D. Constance	12-29	317
CLAY BURNING		
Thermofor Clay Burning Process	3-31	216
CONTROLS (see Instrumentation)		
CORROSION		
Recent Progress in Mitigation of Underground Corrosion—Kirk H. Logan	1-13	78
Laboratory Corrosion Control—W. L. Nelson	3- 3	87
Girbotol Process	3-31	186
Phenolate Process	3-31	188
Thylox Process	3-31	191
Unisol Process	3-31	192
Control of Refinery Corrosion Dependent Upon Eternally Vigilant Program	3-31	246
Method for Field Lining Vessel Heads With Stainless Steel Strip—K. E. Luger	5-12	92
Bureau of Standards Studies Zinc Anodes	5-12	151
Technical Editors Visit North Carolina Corrosion Project	6-16	102
Stainless Steels Minimize Corrosion in Processing Sour Crude Oils—R. B. Tuttle	6-16	104
Scale-Forming and Corrosive Tendencies of Water Predicted by Rapid Methods—Joe R. Wright	6-23	99
Penetron Quickly Determines Steel Thickness—Also, Without Connection to Liquids, Finds Levels and Densities	6-30	106
Stability Index Judges Cooling Water—Joe R. Wright	7-14	112
Rustless Pipe for War and Peace—Frederick Squires	8- 4	70
Preventing Corrosion in Water-Disposal Systems—F. B. Plummer	8-11	123
Marine-Corrosion and Cathodic-Protection Tests at Kure Beach Station—Fabian R. Staley	8-25	108
Formaldehyde as an Inhibitor of Corrosion Caused by Hydrogen Sulfide (A.I.M.E. Abs.)—P. L. Menaul and T. H. Dunn	10-13	93
Controlling Corrosion in Refineries Processing Sour Crudes—W. H. Creel	10-20	132
Corrosion Inhibitor Promises Huge Returns—Kenneth B. Barnes and Charles J. Deegan	10-27	84
Probolog Spots Corrosion, Cracks, Holes in Exchanger Tubes	12-15	121
Corrosion-Resisting Plastic Material Applied to Oil-Field Equipment in Place—E. H. Short, Jr.	12-22	59
Sulfide Corrosion Complicates Tank-Cleaning Operation in Tampico Refinery—Fabian R. Staley	12-29	250
CRACKING, CATALYTIC		
Houdry Adopts New Licensing Plan	1-27	160
New Richmond Unit Makes Refinery One of Largest 100-Octane Sources	1-27	162
Production of Distillate Fuel Oils by Thermofor and Houdry Catalytic Cracking—S. D. Dalton and S. P. Cauley	2-10	80
Smallest Fluid-Catalyst Unit Makes Initial Run	2-10	122
Tide Water Associated Dedicates New Fluid Cat Cracking Plant—L. P. Stockman	2-24	114
Houdry Cycle-Timing System—R. B. Tuttle	2-24	120

	Date	Page
Improvements Increase Efficiency of Fluid Catalytic-Cracking Process—E. V. Murphree, C. L. Brown, E. J. Gohr, C. E. Jahnig, H. Z. Martin, and C. W. Tyson	3- 3	54
Cycloversion Catalytic Cracking Process	3-31	170
Fluid Catalytic Cracking Process	3-31	172
Houdry Catalytic Cracking Process	3-31	174
Suspensoid Catalytic Cracking Process	3-31	176
Thermofor Catalytic Cracking	3-31	178
Hydroforming Process	3-31	180
Topping Unit Converted to Catalytic Cracker Without Production Interruption	3-31	272
Catalytic Cracking of Texas Panhandle Gas Oil by Cycloversion Process—A. E. Buell and Bradley Skinner	5- 5	87
T.C.C. Announces Liquid Processing Using Pelleted Clay or Beaded Catalyst—T. P. Simpson	5-12	88
Aluminum Chloride Produces 80-Octane Fuel	5-12	147
Production "Bug" Expelled by Inert Tower Packing	5-26	174
The T.C.C. Catalytic Cracking Process for Motor-Gasoline Production (Abs.)—R. H. Newton, G. S. Dunham, and T. P. Simpson	6- 2	84
Four Pennsylvania Refiners Operate Joint Aviation-Fuel Plant—Paul Truesdell and W. E. Lemen	6-16	107
Operating Report on Gas-Turbine on Catalyst Regeneration in Sun Oil Co. Refineries—Arthur E. Pew, Jr.	8-11	118
Refiners Will Have Short Reprieve From Octane Race and Betterment in Lubricants—Arch L. Foster	9-22	175
Economics of T.C.C. Process in Plants of Moderate Refining Capacity—H. D. Noll and V. O. Bowles	11-10	83
Liquid-Charge Technique in T.C.C. Processing—T. R. Simpson, S. C. Eastwood and H. G. Shimp	11-24	119
Simplified Catalytic Cracking Unit Meets Requirements of Smaller Refiners—N. K Anderson and M. J. Sterba	12-22	77
CRACKING, THERMAL		
Cracking of Latin American Crude Oils—No. 7—(Argentine)—Dr. Gustav Egloff	1-13	73
Cracking of Latin American Crude Oils—No. 8 (Reforming Argentine Gasoline and Naphtha)—Dr. Gustav Egloff	2-10	107
Gas Reversion Process	3-31	181
Four Pennsylvania Refiners Operate Joint Aviation-Fuel Plant—Paul Truesdell and W. E. Lemen	6-16	107
Olefin Production by Thermal Cracking of Isobutane—Philip M. Arnold	7- 7	87
90,000-Barrel Haifa Refinery Largest in Mediterranean Area—C. O. Willson	11-17	160
Addition of One Coil Increases Cracker's Efficiency by Two Thirds—R. B. Tuttle	12- 1	83
CRUDES, GENERAL		
Evaluation Curves—W. L. Nelson	1-13	91
West Edmond Crude Contains Superior Lube-Oil Fractions	2- 3	32
Processing Asphaltic Crudes	2- 3	71
Cracking of Latin American Crude Oils—No. 8 (Reforming Argentine Gasoline and Naphtha)—Dr. Gustav Egloff	2-10	107
Yields From Crude Oil	2-24	151
Increased Yield From Crude Should Be Postwar Aim—T. M. Martin	3-31	219
Operations Recently Resumed in Kuwait Following Total Shutdown Caused by War—C. O. Willson	8-18	96
Products of Industry's Largest Manufacturing Unit (Anglo-Iranian Oil Co., Ltd., Persian Gulf)—C. O. Willson	10-13	86
Analysis of Crude Oil From Rangely Field	12-22	44
Distillation Tests of Middle East Crude Oils (Table)	12-29	194
CRUDES, SOUR (also see Corrosion)		
Refining Mixtures of Kansas-West Texas Crude Oil Proves Practicable—Arch L. Foster and R. B. Tuttle	1-20	58
Perco Catalytic Desulfurization Process	3-31	194
Catalytic Cracking of Texas Panhandle Gas Oil by Cycloversion Process—A. E. Buell and Bradley Skinner	5- 5	87
Method for Field Lining Vessel Heads With Stainless Steel Strip—K. E. Luger	5-12	92
Stainless Steels Minimize Corrosion in Processing Sour Crude Oils—R. B. Tuttle	6-16	104
Bahrein Island Produces 20,000 Bbl. and Refines 70,000 Bbl. Per Day—C. O. Willson	10-20	110
Controlling Corrosion in Refineries Processing Sour Crudes—W. H. Creel	10-20	132
DESALTING		
Refining Mixtures of Kansas-West Texas Crude Oil Proves Practicable—Arch L. Foster and R. B. Tuttle	1-20	58
Laboratory Salt Control	2-10	119
Crude-Oil Settlers	2-17	121
DEHYDROGENATION		
Houdry Adiabatic Dehydrogenation Process	3-31	210
Perco Dehydrogenation Process	3-31	211
U.O.P. Dehydrogenation Process	3-31	212
DEWAXING		
Propane Dewaxing Process	3-31	207
Wax Manufacturing Process	3-31	209
DIESEL FUELS (see Fuels)		
DISTILLATION (also see Fractionation)		
Laboratory Corrosion Control (by distillation)—W. L. Nelson	3- 3	87
Flash Vaporization (vs. A.S.T.M.)—W. L. Nelson	3-17	125
Topping-Plant Design—W. L. Nelson	3-24	97
Tower Switch Removes Bottleneck—Dr. J. W. Bertetti	3-31	260
Topping Unit Converted to Catalytic Cracker Without Production Interruption	3-31	272
Correlation of True B.P. and Flash Curves—W. L. Nelson	4-14	143
Automatic Distillation Unit Shows Exceptional Efficiency	4-21	127
Stripping Steam—W. L. Nelson	5-12	135
Heating Oil Vapors—W. L. Nelson	5-19	153
Heat of Vaporization—W. L. Nelson	5-26	163
A.S.T.M. and T.B.P. Curves—W. L. Nelson	6- 2	107
Haynesville Plant Recovers Production From Entire Field—Arch L. Foster	6-23	86
Olefin Production by Thermal Cracking of Isobutane—Philip M. Arnold	7- 7	87
Stripper and Bottom Temperatures—W. L. Nelson	7-21	147
Jack for Removing Frozen Tube Still Header Plugs Proves Useful Tool	9- 1	66
90,000-Barrel Haifa Refinery Largest in Mediterranean Area—C. O. Willson	11-17	160
Addition of One Coil Increases Cracker's Efficiency by Two Thirds—R. B. Tuttle	12- 1	83
ECONOMICS (also see "ECONOMICS" section)		
Small Refiners Need Not Fear Postwar Competition—H. B. Kellogg	3-31	219
Record Refinery Operations to Continue	3-31	301

Electronics—Its Application to Petroleum Technology—Part 2—Fabian R. Staley	5-26	123
Electronics—Its Application to Petroleum Technology—Part 3—Fabian R. Staley	6-16	120
ENGINES		
Turbines Plus Piston Engines (Abs.)—C. F. Bachle	1-13	86
New Piston Developments (Abs.)—E. T. Vincent	1-13	86
Effect of Detonation on Fuel Consumption and Engine Life (Abs.)—P. J. Costa	1-13	87
High-Speed Motion Pictures (Abs.)—Richard Painter and Paul Huber	1-13	87
EQUIPMENT (see specific subjects)		
FABRICATION		
Refining Mixtures of Kansas-West Texas Crude Oil Proves Practicable—Arch L. Foster and R. B. Tuttle	1-20	58
Control Method for Welding Alloy Steel	2-17	112
Method for Field Lining Vessel Heads With Stainless Steel Strip—K. E. Luger	5-12	92
Bending Device for Tubing and Small Pipe	5-26	122
Self-Supporting Foundations for Towers and Stacks—W. L. Nelson	8- 4	103
FEED STOCKS (see Crudes)		
FILTRATION		
Application of Contact Filtration in Refining High-Quality Lubricating Oils—P. L. Paull and I. A. Schwint	2- 3	38
Oil-Filtering Unit is Made From Salvaged Parts	3-24	93
Economic Survey of Thermofor Installations in Socony-Vacuum Lubricating Oil Refineries—H. C. Myers and R. M. Owen	8- 4	93
FISCHER-TROPSCH (see Synthesis)		
FLOW OF FLUIDS—Graphic Solutions of Design Problems (a series) by Paul Buthod and B. W. Whiteley		
1—Fluid Flow in Pipes	10-20	122
2—Friction Factors for Fluid Flow	10-27	104
3—Pressure Drop for Liquid Flow	11- 3	120
4—Viscosity of Petroleum Liquids	11-10	100
5—Resistance of Fittings	11-17	286
6—Thermodynamics of Gas Flow	11-24	130
7—Reynolds Number for Gases	12- 1	76
8—Isothermal Flow of Gases	12- 8	92
9—Flow of Gases in Horizontal Pipes	12-15	112
10—Flow of Gases in Vertical Pipes	12-22	70
11—Vertical Flow of Gases	12-29	305
FRACTIONATION (also see Distillation; Plants)		
Topping-Plant Design—W. L. Nelson	3-24	97
Maximum Utilization of Fractionating Equipment in Aviation-Fuel Manufacture—D. N. Ezzell and P. J. Wolfe	3-31	233
Tower Heat Balances—W. L. Nelson	6- 9	109

	Date	Page
Types of Reflux—W. L. Nelson	6-16	143
Haynesville Plant Recovers Production From Entire Field—Arch L. Foster	6-23	86
Tower Temperatures—W. L. Nelson	6-30	129
Tower Capacity—W. L. Nelson	7-14	139
Tray Details—Downcomers and Weirs—W. L. Nelson	7-28	161
Tray Details—Bubble Caps—W. L. Nelson	8-11	125
Side Reflux—W. L. Nelson	8-18	155
Dirty Topping-Plant Streams—W. L. Nelson	9- 1	87
Kerosene and Its Stripping—W. L. Nelson	9- 8	119
Tower Hydraulics—W. L. Nelson	9-15	119
Bringing a Tower on Stream—W. L. Nelson	9-22	325
Number of Fractionating Trays—W. L. Nelson	10- 6	117
Fractionation for Solvents—W. L. Nelson	10-20	161
No Peace for Fractionators—P. J. Harrington, B. L. Bragg III, and C. O. Rhys, Jr.	11-24	135
Process Improvements Mark Design and Operation of Abercrombie Plant	12-15	88
FRONT LINES IN REFINING (a series) by Arch L. Foster		
Insulating Oil Inhibitors Are Specific in Action	1- 6	65
Subzero Aircraft Lubricants	1- 6	65
Resin From Rubber Used to Compound Rubber	1- 6	65
Silicones Incombustible Organics?	2-17	90
Sulfur, Active But Well Behaved	2-17	90
High V.I. Ethylhexyl Sebacate	2-17	90
Thinning Oil to Save Gasoline	4-14	137
Mineral-Free Water for Processing	4-14	137
Postwar Economics—Catalytic Cracking	4-14	137
National Patent Planning Commission Urges Central Control Body	6-30	126
The Price of Too Much Purity	6-30	126
Speeding Chemical Analysis	9-15	117
Finding Material Defects by Sound Waves	9-15	117
Super Fuel From Russian Turpentine	9-15	117
Atomic Bomb Patent Rights Become Federal Property	9-15	117
FUELS, AVIATION (also see Cracking)		
Shell Oil Laboratory to Study Jet-Propulsion Fuels	3-24	65
Maximum Utilization of Fractionating Equipment in Aviation-Fuel Manufacture—D. N. Ezzell and J. P. Wolfe	3-31	233
Domestic 100-Octane Units—Completed, Operating, List of	3-31	290
Foreign 100-Octane Units—Completed and Operating, List of	3-31	290
Domestic 100-Octane Units—Under Construction, List of	3-31	290
Foreign 100-Octane Units—Under Construction, List of	3-31	293
Four Pennsylvania Refiners Operate Joint Aviation-Fuel Plant—Paul Truesdell and W. E. Lemen	6-16	107
Olefin Production by Thermal Cracking of Isobutane—Philip M. Arnold	7- 7	87
Tide Water Associated Operates Ultramodern Aviation-Fuel Plant	7-14	133
Production of 130-Octane Gasoline is Disclosed	8-25	105
Russians Getting Antiknock Element From Turpentine	9- 8	123
Chemists Develop Aviation Fuel "Safe as Kerosene"	9- 8	123
Magnolia Petroleum Co. Chemists Reveal Details of Huge Aviation-Fuel Output	9-29	150
FUELS, DIESEL		
Determination of Gum Content of Diesel Fuels	1-13	84
Gray Desulfurization Process	3-31	193
FUELS, GENERAL (also see Cracking)		
Octane Rating of Civilian Gasoline Receding, Bureau of Mines Reports	2- 3	31
Production of Distillate Fuel Oils by Thermofor and Houdry Catalytic Cracking—S. D. Dalton and S. P. Cauley	2-10	80
Refiners Must Know Fuel Components, Technologist Avers (Wichita Meeting)—Arch L. Foster	5-26	117
Water-Alcohol Injection for Motor Vehicles Proposed	6- 9	70
Haynesville Plant Recovers Production From Entire Field—Arch L. Foster	6-23	86
Lead Shortage Precludes Higher-Octane Gasoline	6-30	135
Minor Changes Shown in Winter Octane Ratings	7-21	160
Less Aviation Fuel, More Fuel Oil is Program (PAW)	7-21	160
Marine Gas Turbine Unveiled for Writers	8- 4	59
Premium Gasoline Specifications Raised	8-25	150
Refiners Will Have Short Reprieve From Octane Race and Betterment in Lubricants—Arch L. Foster	9-22	175
Polymerization and Isomerization Are Effective in Motor-Fuel Manufacture—Arch L. Foster	9-29	103
Performance Characteristics of Gasolines—W. L. Nelson	9-29	139
Lead Response—Cracked and Other Stocks—W. L. Nelson	10-13	137
Lead Response of Gasolines—W. L. Nelson	10-13	145
Lead Susceptibility of Catalytically Desulfurized Gasolines—W. L. Nelson	10-27	127
Unisol Process Improves Octane Number and TEL Susceptibility—C. D. Lowry, Jr., and F. C. Moriarty	11-3	105
Lead Susceptibility of Cracked and Reformed Gasolines—W. L. Nelson	11-10	107
Improved Combustion Head Announced	12-15	79
Octane Race Under Way on East, West and Gulf Coasts—Arch L. Foster	12-29	158
GREASES (see Lubricants)		
HEAT EXCHANGE		
Haynesville Plant Recovers Production From Entire Field—Arch L. Foster	6-23	86
HYDROGENATION		
Hydrogen Manufacture from Gases	3-31	215
Hydrogenation-Dehydrogenation, Aromatization Catalysts Important to Refining Technology—Arch L. Foster	10-13	109
Technical Oil Mission Studies German Petroleum Research Activities—W. L. Schroeder	11-24	112
HYDROGEN FLUORIDE (see Catalysis)		
INSTRUMENTATION		
Houdry Cycle-Timing System—R. B. Tuttle	2-24	120
A New Principle in Measurement—A. J. Rosenberger	3-31	276
Haynesville Plant Recovers Production From Entire Field—Arch L. Foster	6-23	86
Flow Analysis Reduces Errors in Chart Computations—John P. Squier	7-21	143
Paloma Unit—An Advanced Oil, Gas, and Products Producing Operation—Kenneth B. Barnes	9- 8	97
Telemetering—The Modern Control Tool—William A. LaViolette	9-15	88
ISOMERIZATION		
Isomerization of Normal Heptene—A. D. Petrov and V. I. Shchukin	1-20	77
U.O.P. Aluminum Chloride Process	3-31	196
Butane Isomerization Process	3-31	197
Liquid Phase Isomerization Process	3-31	198
Isomate Process	3-31	213
Polymerization and Isomerization Are Effective in Motor-Fuel Manufacture—Arch L. Foster	9-29	103
Products of Industry's Largest Manufacturing Unit (Anglo-Iranian Oil Co., Ltd., Persian Gulf)—C. O. Willson	10-13	86
LABORATORY (also see Analysis; Testing)		
Phillips' New Laboratory Rrepresents Latest in Research Equipment—R. B. Tuttle	1-13	60
Laboratory Corrosion Control	3- 3	87
Phase Equilibria in the Systems Propylene-Acetylene and Propane-Acetylene—J. Lloyd McCurdy and Donald L. Katz	3-17	102
Shell Oil Laboratory to Study Jet-Propulsion Fuels	3-24	65
Oil Technicians Developed Bomb That Blasted Tokyo	3-24	110
Determination of Composition of Commercial Isobutane—J. W. Tooke and R. P. Roberts	4- 7	98
Tests Developed for Evaluating Greases (Annular Bearing Engineers and the National Lubricating Grease Institute)	4- 7	113
Continuous Viscosimeter is Automatic	4-21	116
Automatic Distillation Unit Shows Exceptional Efficiency	4-21	127
Two Research Centers Are Planned by New Jersey Standard	9- 1	47
Mass Spectrometer Analyzes Gases	11-24	143
Bottle-Washing Unit Designed for Laboratory Sample Bottles	11-24	145
Contract Let for Buildings at Bruceton Laboratory of U. S. Bureau of Mines	12-15	132
LIQUEFIED PETROLEUM GASES (also see this heading under "NATURAL GASOLINE")		
Use of LPG as Chemical Raw Material on Upswing—Paul K. Thompson	2- 3	34
Haynesville Plant Recovers Production From Entire Field—Arch L. Foster	6-23	86
LUBRICANTS; LUBRICATION		
Application of Contact Filtration in Refining High-Quality Lubricating Oils—P. L. Paull and I. A. Schwint	2- 3	38
Gray Desulfurization Process	3-31	193
Duo-Sol Process	3-31	203
Furfural Solvent Extraction Process	3-31	204
Phenol Solvent Extraction Process	3-31	205
Solvent Dewaxing Process	3-31	206
Propane Dewaxing Process	3-31	207
Propane Deasphalting Process	3-31	208
Tests Developed for Evaluating Greases (Annular Bearing Engineers and the National Lubricating Grease Institute)	4- 7	113
Advances in Lubricant Refining (Abs. of American Chemical Society Meeting, Wichita)—Arch L. Foster	5-26	117
Oxidation of Paraffins—Part 1—Dr. Ernest Stossel	7-21	130
Economic Survey of Thermofor Installations in Socony-Vacuum Lubricating Oil Refineries—H. C. Myers and R. M. Owen	8- 4	93

XUM

	Date	Page
Lubricant Developed for Jet-Propulsion Engines	8-18	106
Oxidation of Paraffins—Part 2—Dr. Ernest Stossel	8-18	145
Oxidation of Paraffins—Part 3—Dr. Ernest Stossel	9- 1	69
Refiners Will Have Short Reprieve From Octane Race and Betterment in Lubricants—Arch L. Foster	9-22	175
The Amazing New Chemical Family—The Silicones—Arch L. Foster	10- 6	86
Technical Oil Mission Studies German Petroleum Research Activities—W. J. Schroeder	11-24	112
Vast Market for Lubricant Additives is Predicted	12- 1	109
MAINTENANCE		
Revamping, Maintenance Programs Are Asked—J. L. Shakely	3-31	223
Utmost Ingenuity Required in Plant Maintenance—J. F. M. Taylor	3-31	223
Plant-Built Sand Blasters and Dryer	4-28	116
Substantially Built Pipe-Line Tool	6- 2	80
Caliper for Inspecting Tubing Has Four Distinct Advantages	6-23	107

NOTEBOOK, REFINERS (continuation of a series on Modern Refining Methods) by W. L. Nelson		
Straightrun Aviation Gasoline Manufacture—No. 25	1- 6	81
Evaluation Curves—No. 26	1-13	91
Crude Evaporation Losses—No. 2A	1-20	87
Cost of Topping—No. 27	1-27	269
Processing Asphaltic Crudes—No. 28	2- 3	71
Laboratory Salt Control—No. 29	2-10	119
Crude-Oil Settlers—No. 30	2-17	121
Yields From Crude Oil—No. 31	2-24	151
Laboratory Corrosion Control—No. 32	3- 3	87
Solvent Manufacture—No. 33	3-10	83
Flash Vaporization (vs. A.S.T.M.)—No. 34	3-17	125
Topping-Plant Design—No. 35	3-24	97
Analysis for Sulfur—No. 36	4- 7	109
Correlation of True B.P. and Flash Curves—No. 37	4-14	143
Vapor Pressure—No. 38	4-21	141
Vaporizer Temperature and Steam—No. 39	4-28	147
Heating Liquid Oils—No. 40	5- 5	121
Stripping Steam—No. 41	5-12	135
Heating Oil Vapors—No. 42	5-19	153
Heat of Vaporization—No. 43	5-26	163
A.S.T.M. and T.B.P. Curves—No. 44	6- 2	107
Tower Heat Balances—No. 45	6- 9	109
Types of Reflux—No. 46	6-16	143
Vapor Volume and Mol Weight—No. 47	6-23	127
Tower Temperatures—No. 48	6-30	129
Weight of Towers—No. 49	7- 7	121
Tower Capacity—No. 50	7-14	139
Stripper and Bottom Temperatures—No. 51	7-21	147
Tray Details—Downcomers and Weirs—No. 52	7-28	161
Self-Supporting Foundations for Towers and Stacks—No. 53	8- 4	103
Tray Details—Bubble Caps—No. 54	8-11	125
Side Reflux—No. 55	8-18	155
Regulation of Initial Boiling Point and End Point—No. 56	8-25	143
Dirty Topping-Plant Streams—No. 57	9- 1	87
Kerosene and Its Stripping—No. 58	9- 8	119
Tower Hydraulics—No. 59	9-15	119
Bringing a Tower on Stream—No. 60	9-22	325
Performance Characteristics of Gasolines—No. 61	9-29	139
Number of Fractionating Trays—No. 62	10- 6	117
Lead Response of Gasolines—No. 63	10-13	145
Fractionation for Solvents—No. 64	10-20	161
Lead Susceptibility of Catalytically Desulfurized Gasolines—No. 65	10-27	127
Thickness of Welded Towers—No. 66	11- 3	127
Lead Susceptibility of Cracked and Reformed Gasolines—No. 67	11-10	107
Conditions for Maximum Topping-Tower Capacity—No. 68	11-17	293
Topping-Plant Economy—No. 69	11-24	147
Tower Inspection—No. 70	12- 1	101
How Big an Exchanger?—No. 71	12- 8	111
Evaluation of Diesel Fuels—No. 72	12-15	127
Temperature Difference in Exchangers—No. 73	12-22	91
Sulfuric-Acid Solutions—No. 74	12-29	321
PATENTS		
Seized Chemical Patents Now Readily Accessible	3- 3	95
N.A.M. Endorses Patent Bills	4- 7	56
Decision Reserved in Standard's Patents Case	6-30	80
Four Patents, Available for License, Filed by Tietig	8- 4	114
Register Established for Clearing Patents	9- 8	123
PILOT PLANTS (see Laboratory)		
PLANTS, GENERAL		
Creole Plans for Venezuelan Refinery Are Progressing	3-31	161
Tower Switch Removes Bottleneck—Dr. J. W. Bertetti	3-31	260
Domestic 100-Octane Units—Completed, Operating, List of	3-31	290
Foreign 100-Octane Units—Completed and Operating, List of	3-31	290
Domestic 100-Octane Units—Under Construction, List of	3-31	290
Foreign 100-Octane Units—Under Construction, List of	3-31	293
Toluene Plants—Completed and Operating, List of	3-31	293
Butadiene Plants—Completed and Operating, List of	3-31	293
Butyl Plants—Completed and Operating, List of	3-31	293
North American Operating Refineries, Their Capacities and Locations	3-31	296
Operating Refineries in Canada, Capacities and Locations	3-31	301
Operating Refineries in Mexico, Capacities and Locations	3-31	301
Production "Bug" Expelled by Inert Tower Packing	5-26	174
Haynesville Plant Recovers Production From Entire Field—Arch L. Foster	6-23	86
Navajo Plant Yields Large Amounts of War-Needed Helium—Arch L. Foster	7-28	130
Selection of Venezuela Refinery Site Result of 2-Year Study	8- 4	55
Economic Survey of Thermofor Installations in Socony-Vacuum Lubricating Oil Refineries—H. C. Myers and R. M. Owen	8- 4	93
Plant Improvements Begun by Cosden at Big Spring	8-11	127
Work Started on First Oil Refinery in Mississippi	8-11	128
Jack for Removing Frozen Tube Still Header Plugs Proves Useful Tool	9- 1	66
Sugar Creek, Mo. Refinery Construction Program Gets Under Way	10- 6	124
California Standard Plans $20,000,000 Construction Program	10- 6	124
Products of Industry's Largest Manufacturing Unit (Anglo-Iranian Oil Co., Ltd., Persian Gulf)—C. O. Willson	10-13	86
Bahrein Island Produces 20,000 Bbl. and Refines 70,000 Bbl. Per Day—C. O. Willson	10-20	110
Saudi Arabian Petroleum Operations Are Rapidly Reaching Major Proportions—C. O. Willson	11- 3	70
French Oil Industry Slowly Emerging From War's Wreckage (Includes status of all plants—C. O. Willson	11-10	73
Wartime Refining Equipment Needs Alteration for Peacetime Use	11-17	158
90,000-Barrel Haifa Refinery Largest in Mediterranean Area—C. O. Willson	11-17	160
Only Production in Egypt Comes From Two Fields on Suez Gulf Shores—C. O. Willson	12- 8	62
Process Improvements Mark Design and Operation of Abercrombie Plant	12-15	88
PLANT PRACTICES		
Versatile Pipe-Bending Machine	1-20	82
An Inexpensive Water Cooler	2- 3	65
An Effective Method for Cleaning Heat-Exchanger Bundles	2- 3	65
Machine for Facing Tower Nozzles	2-17	107

NATURAL GAS — *Technical Articles on Engineering and Operating Subjects*

	Date	Page
Caliper for Inspecting Tubing Has Four Distinct Advantages	6-23	107
Maljamar Repressuring Plant Expanded in Logical Steps—Kenneth B. Barnes	7- 7	104
Rustless Pipe for War and Peace—Frederick Squires	8- 4	70
Marine-Corrosion and Cathodic-Protection Tests at Kure Beach Station—Fabian R. Staley	8-25	108
Condensate-Well-Corrosion Studies Broadened by N.G.A.A.	9- 8	83
Formaldehyde as an Inhibitor of Corrosion Caused by Hydrogen Sulfide (A.I.M.E. Abs.)—P. L. Menaul and T. H. Dunn	10-13	93
Corrosion Inhibitor Promises Huge Returns—Kenneth B. Barnes and Charles J. Deegan	10-27	84
Pittsburgh Corrosion Forum is Organized	12- 8	126
Probolog Spots Corrosion, Cracks, Holes in Exchanger Tubes	12-15	121
Corrosion-Resisting Plastic Material Applied to Oil-Field Equipment in Place—E. H. Short, Jr.	12-22	59
CYCLING (see this heading under "PRODUCTION")		
DEHYDRATION		
Maljamar Repressuring Plant Expanded in Logical Steps—Kenneth B. Barnes	7- 7	104
Research Study of Gas Dehydration	12- 8	126
Application of Diethylene Glycol-Water Solution for Dehydration of Natural Gas—N. K. Senatoroff	12-15	98
DRILLING ACTIVITY (see this heading under "ECONOMICS")		
ENGINEERING, GENERAL		
Practical, Economic Method of Reconditioning Gas for Injection—Frank B. Taylor	3-17	104
Alignment Chart for Convenient Calculation of Pipe-Line Storage Capacity—W. D. Parkes	3-17	114
Alignment Chart for Calculating Volume of Gas Lost When Blowing Line Section Through Open End—W. D. Parkes	3-24	81
New Gas-Engine Design Reduces Fuel Consumption 25 Per Cent—Ralph L. Boyer	3-24	88
Texas Pushing Gas Conservation	4- 7	57
Flow Equations for Gas Considering Deviations From Ideal Gas Laws—W. O. Clinedinst	4- 7	79
Alignment Chart for Correcting Natural Gas for Specific Gravity and Temperature—W. D. Parkes	4-28	122
Gas Reserves at Too, Kelly Tells Measurement School	4-28	163
Electronics—Its Application to Petroleum Technology—Part 1—Fabian R. Staley	5- 5	82
Electronics—Its Application to Petroleum Technology—Part 2—Fabian R. Staley	5-26	123
Alignment Chart for Pipe-Line Leakage Tests—W. D. Parkes	6- 9	103
Electronics—Its Application to Petroleum Technology Part 3—Fabian R. Staley	6-16	120
Alignment Chart for Natural Gas Pipe Line Operations—W. D. Parkes	6-16	131
Institute of Gas Technology Publishes "Gas Abstracts"	6-30	132
FPC Schedules Three Hearings on Natural-Gas Investigation	7- 7	63
FPC Regulations (Natural-Gas) Would Nullify Effect of State Conservation Laws	9-29	88
New Division is Established by Sun Oil Co.	11-17	297
FISCHER-TROPSCH PROCESS (see Synthesis under "REFINING")		
HELIUM		
Helium Sales at High Level Owing to Industrial Use	1- 6	88
Helium Pipe Line Valve Wins Award	3- 3	99
B. of M. Starts World's Biggest Helium Storage	3-10	99
Cunningham's Helium Plant Smashes Prewar Records	4-21	146
Lake City Gas Available for Helium if Needed	7- 7	133
Navajo Plant Yields Large Amounts of War-Needed Helium—Arch L. Foster	7-28	130
Helium Playing "Sleuth" in Getting Oil and Gas Facts	7-28	162
Helium Production at Two Plants is Suspended	8-11	137
Government Sees Bright Future for Helium Gas	9- 8	125
LIQUEFIED PETROLEUM GASES (see this heading under "NATURAL GASOLINE")		
MEASUREMENT		
Instrumentation—A New Principle of Measurement—A. J. Rosenberger	3-31	276
Flow Analysis Reduces Errors in Chart Computations—John P. Squier	7-21	143
Paloma Unit—An Advanced Oil, Gas, and Products Producing Operation—Part 1—Kenneth B. Barnes	8-18	112
Telemetering—The Modern Control Tool—William A. LaViolette	9-15	88
PIPE-LINE (also see headings under "PIPE LINE")		
Alignment Chart for Convenient Calculation of Pipe-Line Storage Capacity—W. D. Parkes	3-17	114
Alignment Chart for Calculating Volume of Gas Lost When Blowing Line Section Through Open End—W. D. Parkes	3-24	81
Alignment Chart for Correcting Natural Gas for Specific Gravity and Temperature—W. D. Parkes	4-28	122
Alignment Chart for Pipe-Line Leakage Tests—W. D. Parkes	6- 9	103
Alignment Chart for Natural Gas Pipe Line Operations—W. D. Parkes	6-16	131
United Plans to Increase Carthage Field Facilities	7-28	162
Contract Disposes of Barnsdall Flare Gas	7-28	162
Unusual Design Features United Gas Carthage Field-Monroe Line—Neil Williams	10- 6	93
PRODUCTION		
Carthage Area Holds Promise of Becoming World's Largest Gas Reserve—Neil Williams	5-19	102
States Show Vast Progress in Natural-Gas Conversion	6-16	92
States Urged to Vitalize Policies in Natural-Gas Conservation—H. Stanley Norman	6-23	76
The Nation's Reserves of Natural Gas—E. DeGolyer	6-23	76
Rating of Poor Gas Wells as Marginal Suggested	6-23	143
Four Texas Gas-Conservation Projects Follow Freeing of Materials	8-25	95
Measuring Distribution of Liquids in Flowstring of a Gas-Condensate Well—C. K. Eilerts, R. V. Smith, and V. L. Barr	12-15	91
PROPERTIES		
Composition and Physical Constants of Hydrocarbons—Park J. Jones	1-13	64
Molal, Weight, and Volume Composition—Park J. Jones	1-20	64
The Volume per Thousand Cubic Feet of Gas—Park J. Jones	1-27	263
Application of Equilibrium Constants—Park J. Jones	2-24	140
Viscosity of Reservoir Liquids and Gases—Park J. Jones	3- 3	53
Phase Equilibria in the Systems Propylene-Acetylene and Propane-Acetylene—J. Lloyd McCurdy and Donald L. Katz	3-17	102
Air-Gas Products Developed by Chemists	10- 6	125
N.G.A.A. Standard Table of Physical Constants for Paraffin Hydrocarbons	10-13	115
Inflammability of Natural Gas: Effect of Pressure Upon the Limits—G. W. Jones and R. E. Kennedy	11-10	78
REGULATION OF PRESSURE (see Control)		
RESERVES (see heading under "PRODUCTION")		
STORAGE		
Haynesville Plant Dedication Scheduled for June 1	5-19	106
Consolidated Gas Seeks Storage Permit	12-22	105
TREATING (also see this heading under "REFINING" section)		
Girbotol Process	3-31	186
Kansas Sour Gas Economically Sweetened Through Small Plant	5-19	123
Maljamar Repressuring Plant Expanded in Logical Steps—Kenneth B. Barnes	7- 7	104

Natural Gasoline

Tannin Solutizer Process	3-31	190
Thylox Process	3-31	191
Unisol Process	3-31	192
Shell Phosphate Desulfurization Process	3-31	195
Instrumentation—A New Principle in Measurement—A. J. Rosenberger	3-31	276
Haynesville Unit Starts Gasoline Plant Operation	3-31	313
Electronics—Its Application to Petroleum Technology—Part 1—Fabian R. Staley	5- 5	82
Effect of Supercompressibility of Natural Gas Upon Compressor Performance—Robert S. Ridgway	5-12	104
Carthage Area Holds Promise of Becoming World's Largest Gas Reserve—Neil Williams	5-19	102
Haynesville Plant Dedication Scheduled for June 1	5-19	106
Increasing Propane Recovery in Existing Natural-Gasoline Absorption Plants—F. W. Bell	5-19	114
Electronics—Its Application to Petroleum Technology—Part 2—Fabian R. Staley	5-26	123
New Texas Plant (Winnie) to Use Scattered Gas	6-16	96
Electronics—Its Application to Petroleum Technology—Part 3—Fabian R. Staley	6-16	120
Haynesville Plant Recovers Production From Entire Field—Arch L. Foster	6-23	86
Lines Being Laid for New McCarthy Gasoline Plant	6-23	143
Northern Natural to Build Gasoline Plant in Kansas	6-23	143
Maljamar Repressuring Plant Expanded in Logical Steps—Kenneth B. Barnes	7- 7	104
Navajo Plant Yields Large Amounts of War-Needed Helium—Arch L. Foster	7-28	130
United Plans to Increase Carthage Field Facilities	7-28	162
Eight Texas Plants to Be Completed This Year	8- 4	59
Paloma Unit—An Advanced Oil, Gas, and Products Producing Operation—Part 2—Kenneth B. Barnes	8-25	117
Caska Starts Construction of Plant in Quitman Area	11-10	123
Process Improvements Mark Design and Operation of Abercrombie Plant	12-15	88
LIQUEFIED PETROLEUM GASES (also see "REFINING"; "NATURAL GAS" sections)		
Progress of the Liquefied Petroleum Gas Industry in 1944—G. G. Oberfell and R. W. Thomas	1- 6	38
Use of LPG as Chemical Raw Material on Upswing—Paul K. Thompson	2- 3	34
Form Utility of Light Hydrocarbon Fuels	2-24	163
Phase Equilibria in the Systems Propylene-Acetylene and Propane-Acetylene—J. Lloyd McCurdy and Donald L. Katz	3-17	102
Revised Table of Physical Constants Now Available	6-30	132
Physical Properties of Light Hydrocarbons—M. L. Smith and G. H. Hanson	7-14	119
Value of Liquids From Refinery Gases—W. L. Nelson	9- 1	81
Some Future Products From Synthesis of Petroleum and Natural Gas (A.I.M.E. Abs.)—H. P. Hohenadel	10-13	94
N.G.A.A. Standard Table of Physical Constants for Paraffin Hydrocarbons	10-13	115
Use of Liquefied Petroleum Gas Triples in Two Years	11-10	123
Phillips Sells Seaboard Philgas Properties	12-15	131
STATISTICS, NATURAL GASOLINE		
Output of Natural Gasoline Makes New High Record	5- 5	122
Decline in Demand Affects Natural-Gasoline Output	6- 2	108
April Output of Natural Gasoline Rises Slightly	6-30	132
Output of Natural Gasoline Continues to Increase	7-28	162
Decline Registered in June Output of Natural Gasoline	9- 1	101
Further Drop Registered in Natural-Gasoline Output	10- 6	126
Natural-Gasoline Output Continues Its Decline (August & July figures)	11- 3	129

Exploration

Special Committee to Consider Continuing PIWC Activity—Henry D. Ralph	11- 3	64
Authorization Given for Formation of National Petroleum Council	11-17	153
Detailed List of Committees and Personnel	11-17	176
Strong Consultive Organization to Succeed PIWC Urged at A.P.I. Meeting—H. Stanley Norman and Arch L. Foster	11-24	87
Boyd Honored for PIWC Service	12-15	72
Council Shelves Idea of Permanent Oil Agency	12-29	166
PRICES		
Double-Barreled Attack is Launched on Crude Ceilings—Henry D. Ralph	1- 6	32
Committee to Consider Costs, Looking to Price Revisions—Henry D. Ralph	1-13	44
Sinclair Posts Prices in Big Sand Draw Field	1-13	56
Price Committee Seeks to Base Ceilings on Replacement Costs	1-20	46
Price Questionnaire Soon to Be Mailed Representative Producers—Henry D. Ralph	2-17	76
Texas' Effort Praised, Price Regulations Flayed, at Dallas	2-24	110
Replacement Cost Ignored in OPA Crude-Oil Price Survey	3- 3	40
Replacement Costs May Be Used to Support Higher-Price Demand—Henry D. Ralph	4-21	89
Boren Bill Would Increase Price of Oil and Products	4-28	107
OPA Grants Higher Prices for Crude in Eight Fields	6-16	92
OPA Accounting Methods in Crude-Price Study Win Approval—Henry D. Ralph	6-23	72
Refiners Cannot Absorb Crude Price Rise, Committee is Told—Arch L. Foster	6-23	83
Prices Posted for Wyoming and Montana Fields	6-30	82
Crude-Oil Ceilings Raised by OPA in Six States	6-30	87
Increases Posted in Three Wyoming Oil Fields	7-14	84
Increases Granted in Texas and Wyoming Oil Fields	7-21	94
Price Increase for West Texas Ordovician Fields	7-28	110
OPA Grants Crude-Price Increases in 21 Pools	8- 4	69
Crude Price Increase for Abell Pool, Pecos County	8-11	71
Tariff Commission Predicts Higher Prices for Oil	8-18	109
Lower Ceilings Apply to East Coast Products	9- 8	77
OPA Grants Higher Crude Ceilings in 22 Pools	9- 8	77
Ceiling Price Changed in Four Scattered Fields	10- 6	85
Responsibility of Independent Operator (I.P.A.A. Abs.)—Ralph T. Zook	10-20	99
Refiner-to-Refiner Ceilings on Oil Products Removed	11- 3	131
Ceiling Prices for Crude Raised in 21 Pools	12- 1	47
Indiana Standard Posts Prices for Wyoming Oil	12- 1	48
Price-Ceiling Removal Sought to Relieve Short Fuel Supply	12-22	41
RECONSTRUCTION FINANCE CORP. (and Defense Supplies Corp.)		
RFC Reports on Petroleum Expenditures	1-13	46
Stripper-Well Adjustments Now Handled by RFC	7-28	110
Five Refining Plants Declared Surplus by D.P.C.	9- 1	48
RESEARCH		
Voluntary Exchange of Technical Information Favored by Dearborn	2-17	79
National Standards	2-17	113
Midwest Research Group Launches Broad Program	2-17	128
Future Demands Greater Intensification of Research —R. P. Russell	3-31	223
Future of the Industry in Hands of the Chemist—Dr. Gustav Egloff	3-31	227
American Gas Association to Intensify Research	5-19	159
Standard of Indiana Regroups Key Men in Research and Development	7- 7	71
Enemy Technical Reports Investigative Committee is Organized	7- 7	130
Sixty-One Texas Co. Men Honored for Research	7- 7	131
Esso Laboratories Cited for "Outstanding Services"	7-28	165
Plans Made for Dissemination of Nazi Oil Processes —Henry D. Ralph	8-11	70
Indiana Standard Expands Engineering Activities	8-11	127
Petroleum Industry Helped to Develop Atomic Bomb	8-18	105
Few Major Secrets of Oil's Role in War Remain Untold	8-25	105
Two Research Centers Are Planned by New Jersey Standard	9- 1	47

	Date	Page
Indiana Standard to Build Great Research Plant	9-15	74
Carter Helped Develop Radio-Proximity Fuse	10- 6	70
Secondary Recovery Research (I.P.A.A. Abs.)—Don T. Andrus	10-20	105
A.A.P.G. to Make Widespread Survey of Research Facilities—Charles J. Deegan	10-20	117
West Virginia University to Have New Synthetic Liquid Fuel Research Unit	11-10	58
Research Unit Planned by Shell to Cost $1,000,000	11-10	71
RESERVES (see this heading under "PRODUCTION")		
SAFETY (also see "DRILLING," "PRODUCTION," " REFINING," etc.)		
Phillips Conducts Safety Course	1-13	72
Standard of California Wins Fourth Safety Award	7-14	85
STATISTICS (see this heading under "NATURAL GASOLINE," "PRODUCTION," "REFINING")		
STRIKES (see Manpower)		
SUBSIDY PAYMENTS		
Subsidy Payments to Total $55,000,000 Annually	1- 6	41
Crude Subsidies Paid After January 1 Held Legal	1- 6	42
Permanent Subsidy Favored for Strippers	1-20	46
Few High-Cost Pools Qualify for Subsidies	1-20	55
California Receiving 100,000 Bbl. Outside Oil	2-24	107
Increases in Price Ceilings Granted for 25 Oil Pools	2-24	112
Subsidy Authorization is $290,000,000	3-17	64
OPA Moves to Simplify and Expedite Subsidy Revisions	3-31	162
OPA Completes Subsidy List for April Payments	4-14	100
Crude-Oil Purchasers Warned to Deny Subsidy to Uncertified Wells	4-21	90
Additional Pools Included in Subsidy Program Announced	5- 5	80
New Pools in Subsidy List Are Announced by OPA	5-19	110
Appropriation for Oil Subsidy is Passed	6- 2	64
Stripper-Well Subsidy List is Revised	6- 9	69
Oil Subsidies to Stop With End of Price Control, Says O. D. Judd	9- 1	44
Price Ceilings and Stripper Subsidy Payments Uncertain	9- 8	74
SUPPLY AND DEMAND, General		
Passenger-Car Tire Shortage to Persist Long After War Ends	1- 6	41
World-Wide Fuel Shortage Will Test Industry's Resources	7-28	109
Consumers Again Urged to Arrange Fuel-Oil Supplies	8-11	72
Grave Dangers Seen in "World Oil Cartel"	9-22	166
The Long and Short Term Demand for Oil (I.P.A.A. Abs.)—J. V. Brown	10-20	105
World Oil Supply—William B. Heroy	10-27	89
Demand for Crude to Be Above Earlier Postwar Estimates (Comparisons by quarters during 1946 with current levels are included)	11- 3	68
Oil's War Story: Plenty, When and Where Needed—Henry D. Ralph and Charles J. Deegan	11-17	172
PAW Program Division Predicts Strong Demand Situation Starting in 1946—H. Stanley Norman	12- 1	52
Interstate Compact Discusses Submerged Lands, Natural Gas, Economic Trends—Kenneth B. Barnes	12-22	48
Estimated World-Wide Requirements of Major Petroleum Products, Exclusive of Russian Controlled Areas, 1946	12-29	172
Estimated World-Wide Supplies of Major Petroleum Products, Exclusive of Russian Controlled Areas	12-29	173
SUPPLY AND DEMAND, Production		
Record Production Rate Set for February	1-27	166
United States Supply and Demand (I.P.A.A. Abs.)—H. B. Fell	10-20	100
SUPPLY AND DEMAND, Refining		
Demand for Motor Fuel in January Virtually Static	1- 6	34
Postwar Interim Should Be Used to Build Up Inventories	3-24	55
"Fill Tanks Now" Campaign Started to Avert Shortage	7-21	94
Tight Situation Seen in Supply of Kerosene, Distillate, Residual—Stuart P. Coleman	12- 1	61
TAXES		
Industry Plans Relief Measures in Adverse Income-Tax Decision	3-31	160
Immediate Threat Removed on Intangible Tax Chargeoff—Henry D. Ralph	4- 7	58
General Depletion Committee Meets	4- 7	58
Drilling-Cost Relief Will Be Sought in Congressional Action	4-14	88
Oklahoma Now Has Highest Gasoline Tax in Nation	4-21	100
Congressional Aid Looms in Fight to Retain Intangible-Deduction Benefits	5- 5	69
Privilege Restored for Deducting Intangible Drilling Expenses	5-12	80
Treasury Has No Objection to Doughton Resolution	6- 9	68
Final Congressional Action Gives Nod to Intangibles Deduction	7-28	108
Treasury Action Upheld in Intangible Drilling Costs Case	9- 1	44
Tax Policy and Advisory Committee (I.P.A.A. Abs.)—Tom Marshall	10-20	105
Louisiana's Gasoline Tax $239,776,748 in 24 Years	12- 8	122
TRAINING PROGRAMS (see Manpower)		
TRANSPORTATION (see this heading under "PIPE LINE" section)		
TRENDS, INDUSTRY		
Diesel Not a Competitor of Gasoline Engine	1- 6	41
Combination Stations and Stores Seen for Postwar Merchandising—N. O. Fanning	1-13	55
Future Trends in Refining—A. P. Frame	1-27	177
Gasoline, Tire, Car Restrictions to Continue Through 1945	2-10	60
Many Refiners Considering Postwar Expansion Plans	2-17	129
Prospects Held Bright for Postwar Aviation	2-24	111
Postwar Interim Should Be Used to Build Up Inventories	3-24	55
War Record Reassuring; Future Faced Confidently—D. G. Gerstenberger	3-31	224
New Processes and the Small Refiner—C. L. Henderson	3-31	224
U. S. Should Maintain World Oil Leadership—D. P. Hamilton	3-31	227
Postwar Utility of Wartime Construction—David E. Day	3-31	231
Future Bright for New Products and Processes—M. Halpern	3-31	231
Time Has Arrived for Removal of Bottlenecks—M. W. Boyer	3-31	231
Close Cooperation Within Industry Has Made Possible Its Wartime Achievements—Henry D. Ralph	3-31	288
Gill Expects Capital Outlay by Industry to Reach 23 Billion Annually	4- 7	68
Important Export Business in Prospect, Says Henle	4-28	160
Holman Sees Cloudy Days Ahead for Oil Industry	6- 2	53
Technical Training of Returning Service Men (Symposium of Reports of Deans of Engineering Schools)	6- 2	66
Earnings Reflect Record Operations—F. J. Sansone	7-14	88
Petroleum Enters Into Production of Almost All Modern Articles	8-14	56
Oil Industry to Begin Program of Reconversion Immediately—Henry D. Ralph	8-18	100
California Operators Face Problems in Postwar Conversion Programs—L. P. Stockman	8-25	95
Wiess Predicts 12-Month Lull in Crude-Oil Demand	8-25	96
Orderly Shift to Peacetime Economy in Mountain Region—T. R. Ingram	9- 1	40
Production Curtailment, Work-Week Revision, Begun in California—L. P. Stockman	9- 1	40
Drastic Cut in Texas Production Sets New Postwar Basis	9- 8	78
N.P.A. Meeting Considers Wages, Taxes, Trends and Labor Relations	9-29	92
Steady Increase in Total Demand Forecast at Senate Hearing—Henry D. Ralph	10-13	84
Sales of Gasoline in Texas Show Marked Increase	10-13	154
"Revolution in Refining" at Hand, Says Egloff	10-13	154
Gas and Carbon-Black Tax Revenues Up in Texas	10-13	157
30-Company Analysis Compares War and Prewar Conditions	12- 1	47
Tight Situation Seen in Supply of Kerosene, Distillate, Residual—Stuart P. Coleman	12- 1	61
"Nonsense," Says Holman of Gloomy Oil Prophecies	12- 8	75
Interstate Compact Discusses Submerged Lands, Natural Gas, Economic Trends—Kenneth B. Barnes	12-22	48
Wartime Changes in World Refinery Operations, by Percentages for Principal Areas	12-29	168
Petroleum Production and Refinery Runs (World—Excluding Axis and Russian Areas)	12-29	170
Increase in Petroleum Production and Refinery Runs (United States vs. Foreign)	12-29	171
World Crude-Oil Production, 1900-1945	12-29	176
Estimated Postwar Refinery Crude Runs in Comparison With Wartime Runs	12-29	176
Increase in Available Foreign Production	12-29	177
Estimated Postwar Petroleum Production in Comparison With Wartime Production	12-29	177
WAGES (also see Manpower)		
Jersey Company Raising Employe-Wage Base	9- 8	72
Socony-Vacuum Grants 10 Per Cent Wage Raise	9- 8	72
WAR LABOR BOARD (also see Manpower)		
WLB Establishes Approvable Wage Rates for Rig Builders	1-13	50
Reexamination of Refinery Wages Asked by WLB	1-13	98
Ingleside Injunction Continued Pending Study of Testimony	6-16	90
WAR PRODUCTION BOARD		
Oil Equipment Assigned Top Spot in Post V-E Day Allocations	4-28	99
Priorities System Will Be Simplified	7-14	115
WPB Surrenders Control Over All But Scarcest Commodities	8-25	106
WPB to Be Dissolved; New Agency Formed	10-13	82

Trade Associations

	Date	Page
AMERICAN ASSOCIATION OF OILWELL DRILLING CONTRACTORS		
Contractors' Meeting is Scheduled for October 1	9-29	95
Drilling Contractors Are Warned of Reduced Rig Activity	10- 6	84
Bohart Tells Contractors Major Task is Finding New Reserves	10-13	97
AMERICAN ASSOCIATION OF PETROLEUM GEOLOGISTS		
Geologists Elect; Bestow Awards	3-31	167
1946 A.A.P.G. Meeting Set for April in Chicago	9-29	89
A.A.P.G. to Make Widespread Survey of Research Facilities—Charles J. Deegan	10-20	117
Pacific Section A.A.P.G. and Allied Groups Meet in Los Angeles—L. P. Stockman	11-17	166
AMERICAN CHEMICAL SOCIETY		
Refiner Must Know Fuel Components, Technologist Avers (Wichita Meeting)—Arch L. Foster	5-26	117
AMERICAN GAS ASSOCIATION		
American Gas Association to Intensify Research	5-19	159
A.G.A. Backs P.I.W.C.'s Policy on Natural Gas	6-16	149
A.G.A. Conference Lays Plans for Year's Work	7- 7	133
A.G.A. to Hold Annual Meeting on October 24	8-11	72
Wolf Succeeds Forward as Key Man in A.G.A.	8-11	82
A.G.A. to Give Training Course in Fundamentals	9- 1	101
Personnel Conference Held by Midwest Gas Group	10-13	157
A.G.A. Has Committee on Natural-Gas Reserves	10-20	167
Boothby Named President of A.G.A.; Robinson Gets Munroe Award	10-27	77
Key to Industry's Problems is in Leadership, Says Gallagher	11- 3	66
AMERICAN INSTITUTE OF CHEMICAL ENGINEERS		
Olefins Used to Make Huge Chemical Tonnage in 1945, A.I.Ch.E. Meeting Told—Arch L. Foster	12-29	159
AMERICAN INSTITUTE OF MINING AND METALLURGICAL ENGINEERS		
A.I.M.E. (Mid-Cont. Sec.) Told Secondary Results of Atomic Energy Soon to Be Felt—Charles J. Deegan	9-22	168
Hydrogen-Sulfide Corrosion is Stopped, A.I.M.E. Group Told—Charles J. Deegan	10-13	93
Mid-Continent Section Meeting, Tulsa, Oct. 8 and 9:		
Formaldehyde as an Inhibitor of Corrosion Caused by Hydrogen Sulfide (Abs.)—P. L. Menaul and T. H. Dunn	10-13	93
An Application of Statistical Methods to Data of Porosity and Permeability of Dolomitic Limestones (Abs.)—A. C. Bulnes	10-13	94
The Electrolytic Model and Its Application to the Study of Recovery Problems (Abs.)—Holbrook G. Botset	10-13	94
Method for Determining Minimum Waiting on Cement Time (Abs.)—R. Floyd Farris	10-13	94
Some Future Products From Synthesis of Petroleum and Natural Gas (Abs.)—H. P. Hohenadel	10-13	94
A.I.M.E. Concludes Series of Mid-Continent Meetings—Charles J. Deegan	10-20	106
Gulf Coast Section Meeting (Houston, Oct. 10) and North Texas Section Meeting (Oct. 12 and 13):		
A New Technique for Determining the Porosity of Drill Cuttings (Abs.)—M. A. Westbrook and J. F. Redmond	10-20	159
Some Recent Developments in Mud Analysis Logging (Abs.)—B. Otto Pixler	10-20	159
Performance of Distillate Reservoirs in Gas Cycling (Abs.)—W. Hurst and A. F. Van Everdingen	10-20	159
A Neutron Method for Measuring Saturations in Laboratory Flow Experiments (Abs.)—E. Brunner and E. S. Mardock	10-20	159
Effect of Arsenates on the Viscosity of Drilling Muds (Abs.)—B. C. Craft and C. M. Moncrief	10-20	159
Precision in Bottom-Hole-Pressure Measurement (Abs.)—E. R. Brownscombe and D. R. Conlon	10-20	160
California A.I.M.E. Sessions Devoted to Reservoir Discussions—L. P. Stockman	10-27	78
Southern California Section Meeting, Los Angeles, Oct. 19:		
Over-All Picture of Work Accomplished at Elk Hills (Abs.)—John Domerco	11- 3	109
Running Instruments in Annulus of Tubed Wells (Abs.)—C. C. Olson	11- 3	110
Annulus Method of Locating Water in an Oil Well (Abs.)—John Hagestad	11- 3	110
Helium as a Tracer in Injected Gas (Abs.)—G. P. Shea	11- 3	110
Factors Influencing the Plugging Characteristics of an Oil Well Injection Water (Abs.)—William F. Cerini	11- 3	110
The Viscosity of Air, Water, Natural Gas, Crude Oil and Gas-Saturated Crude Oil at Oil Field Temperatures and Pressures (Abs.)—Carlton Beal	11- 3	110
Junior A.I.M.E. Has Round-Table Discussion	11- 3	110
AMERICAN PETROLEUM INSTITUTE		
A.P.I. Tally of Petroleum Reserves Shows 20,453,231,000 Bbl.; 2 Billion Gain	3- 3	48
Three Steps Proposed for Energizing Lube Group	3- 3	95
California A.P.I. Meet Hears Discussion of Demand, Reserves—L. P. Stockman	4- 7	64
A.P.I. Announces Medical Advisory Committee	5-26	110
A.P.I. Plans to Resume Meetings Next November	9-15	64
Ickes Urges Recognition of National Interest in Petroleum in Addressing A.P.I.	11-17	152
Boyd Pledges Ability of Industry to Continue Forward Progress	11-17	152
Industry Told of Need for Improved Public Relations	11-17	153
Well Spacing Important But Not Only Factor in Maximum Recovery	11-17	154
A.P.I. Provides Program on Personnel Training	11-17	304
Strong Consultive Organization to Succeed PIWC Urged at A.P.I. Meeting—H. Stanley Norman and Arch L. Foster	11-24	87
Bombers With 10,000-Mile Cruising Range Near, Doolittle Tells A.P.I.	11-24	89
AMERICAN SOCIETY OF LUBRICATION ENGINEERS		
Lubrication Engineers to Hold National Meeting	1-13	56
Lubrication Engineers Form Organization	2-17	128
Refiner and Manufacturer Urged to Work Together	10-20	170
AMERICAN SOCIETY OF MECHANICAL ENGINEERS		
A.S.M.E. Establishes New Petroleum Division	1-13	119
Engineers Discuss Dimethyl Silicone Fluids at A.S.M.E. Meeting	12- 8	73
AMERICAN SOCIETY FOR TESTING MATERIALS		
A.S.T.M. Committees Are Organized for Work	4-14	152
A.S.T.M. Reports on Tests of Cracker Distillates	10-20	170
CANADIAN GAS ASSOCIATION		
Canadian Gas Association to Meet at Murray Bay	3- 3	97
Asphalt Institute Chooses Its Officers for the Year	4- 7	114
CALIFORNIA NATURAL GASOLINE ASSOCIATION		
C.N.G.A. Discusses Reconversion Problems at Fall Meeting—L. P. Stockman	10-20	96
CALIFORNIA OIL PRODUCERS		
California Producers Elect Standing Subcommittees	6-30	82
DIESEL ENGINE MANUFACTURERS ASSOCIATION		
Training Symposium Completed by D.E.M.A.	2-17	76
Gulf Coast Refiners Decry Tax-Exempt Cooperatives	6-16	102
INDEPENDENT NATURAL GAS ASSOCIATION OF AMERICA		
Ferguson Heads I.N.G.A.A. Offices in Washington	2-17	131
Whyte Goes to Educational Department of I.N.G.A.	5-19	159
Reduction in Use and Sales Opposed by I.N.G.A.	7- 7	133
FPC and I.N.G.A. Study Natural-Gas Investigation	7-14	145
I.N.G.A. Takes Steps to Obtain Markets for Gas	7-21	163
I.N.G.A. to Hold Annual Meeting November 26	9-29	89
Exportation Itself is Not an Issue, Says I.N.G.A.A.	10-13	157
INDEPENDENT PETROLEUM ASSOCIATION OF AMERICA		
I.P.A.A. Membership Asked to Vote on Price Differential	2- 3	28
I.P.A.A. Holds Five Meetings in California	2-17	82
I.P.A.A. Mails Questionnaire to Test Price-Differential Views	3- 3	46
I.P.A.A. Opposes Oil-Duty Reduction	4-21	89
I.P.A.A. Seeks Price-Law Amendment to Consider Oil-Discovery Costs	6-16	91
Reconversion to Be Center of I.P.A.A. Discussions	10- 6	85
I.P.A.A. Considers Problems Attendant to Conversion to Peacetime Operation—Neil Williams and Charles J. Deegan	10-20	98
Annual Meeting, Tulsa, Oct. 14 to 17:		
Responsibility of Independent Operators (Abs.)—Ralph T. Zook	10-20	99
Report of the General Counsel (Abs.)—Russell B. Brown	10-20	99
How I.P.A.A. Can Help the Compact (Abs.)—Earl Foster	10-20	100
The Interstate Oil Compact Committee (Abs.)—F. G. Stodder	10-20	100
United States Supply and Demand (Abs.)—H. B. Fell	10-20	100
Wartime Refining in Foreign Countries (Abs.)—C. Stribling Snodgrass	10-20	101
The Petroleum Industry and the Army (Abs.)—W. E. R. Covell	10-20	101
Labor Relations (Abs.)—Wm. N. Bonner	10-20	101

	Date	Page
Drilling Contractors (Abs.)—Al Buchanan	10-20	102
Oil and Gas Production Committee (Abs.)—B. A. Hardey	10-20	102
Secondary Recovery (Abs.)—E. W. Hayes	10-20	102
Natural Gas and Distillate Production (Abs.)—J. R. Butler	10-20	105
Secondary Recovery Research (Abs.)—Don T. Andrus	10-20	105
Proposed National Legislation Pertaining to Public Lands (Abs.)—Emery Carper and A. B. Cobb	10-20	105
Tax Policy and Advisory Committee (Abs.)—Tom Marshall	10-20	105
The Long and Short Term Demand for Oil (Abs.)—J. V. Brown	10-20	105
I.P.A.A. Program Would Make Nation Self-Sufficient in Oil—Neil Williams	10-27	80
INSTRUMENT SOCIETY OF AMERICA		
National Instrument Society Formed	5-26	137
INTERSTATE OIL COMPACT COMMISSION		
Interstate Compact Discusses Submerged Lands, Natural Gas, Economic Trends—Kenneth B. Barnes	12-22	48
MID-CONTINENT OIL AND GAS ASSOCIATION		
Marshall Named Chairman of Annual Tax Forum	12-15	74
NATIONAL ASSOCIATION OF CORROSION ENGINEERS		
Corrosion Engineers Plan Technical Sessions	10- 6	130
NATIONAL OIL SCOUTS AND LANDMEN'S ASSOCIATION		
Scouts to Elect New Officers at Dallas	2-17	80
H. F. King Elected to Head Scouts Association	3-31	168
NATIONAL PETROLEUM ASSOCIATION		
N.P.A. Meeting Considers Wages, Taxes, Trends and Labor Relations	9-29	92
NATIONAL STRIPPER WELL OWNERS ASSOCIATION		
National Stripper Well Association Elects Officers	10-20	98
NATURAL GASOLINE ASSOCIATION OF AMERICA		
W.P.R.A. and N.G.A.A. Head Attack on Proposed Oklahoma Gasoline Tax	2-17	85
J. H. Dunn Chosen Head of Natural Gas Association	5-19	159
Condensate-Well-Corrosion Studies Broadened by N.G.A.A.	9- 8	83
NEW MEXICO OIL AND GAS ASSOCIATION		
Welch Chosen President of New Mexico Association	12-15	82
PENNSYLVANIA GRADE CRUDE OIL ASSOCIATION		
Penn Grade Group Blasts Pearson	1- 6	42
Dr. Rudolf J. Pfister, Chief of Oil-Production Research, Pennsylvania Grade Crude Oil Association	1-20	46
Hanks Succeeds Robinson on Nominating Committee	8- 4	59
Penn Grade Expands Production Research	9- 8	76
Pennsylvania Grade Group Elects Clinger President	11-17	167
ROCKY MOUNTAIN OIL & GAS ASSOCIATION		
Rocky Mountain Association Establishes Office in Casper; Officers Are Elected	3-10	44
R.M.O.G.A. Preparing for Its Increasing Problems	4-28	102
Rocky Mountain Group Seeks Liberalized Leasing Laws—Neil Williams	12-15*	85
SOCIETY OF AUTOMOTIVE ENGINEERS		
Turbines Plus Piston Engines (Abs.)—C. F. Bachle	1-13	86
New Piston Developments (Abs.)—E. T. Vincent	1-13	86
Effect of Detonation on Fuel Consumption and Engine Life (Abs.)—P. J. Costa	1-13	87
High-Speed Motion Pictures—Richard Painter and Paul Huber	1-13	87
Automotive Engineers Dedicated to Maximum Effort for Victory—Arch L. Foster	1-20	52
Planes to Use Tank Car of Fuel Every 5 Minutes	4-14	87
Reinforced Lubricants, Diesel Fuels Hold Attention of S.A.E. Meeting—Arch L. Foster	11-10	68
SOCIETY OF EXPLORATION GEOPHYSICISTS		
Geophysicists to Hold Wartime Meeting	3-31	162
Geophysicists Ponder Manpower at Fourth Wartime Conference	4- 7	57
Pacific Section A.A.P.G., and Allied Groups Meet in Los Angeles—L. P. Stockman	11-17	166
WESTERN OIL AND GAS ASSOCIATION		
Association Announces Change in Name	2-17	82
WESTERN PETROLEUM REFINERS ASSOCIATION		
W.P.R.A. and N.G.A.A. Head Attack on Proposed Oklahoma Gasoline Tax	2-17	85

Field Developments

	Date	Page
ALABAMA		
Week's Highlights (Geol.)	8-18	173
Oil and Natural-Gas Board Established in Alabama	10-20	118
Central Electric Power Plant Solves Pumping Problem at Gilbertown—Neil Williams	11-17	276
Week's Highlights (Geol.)	11-17	307
ARKANSAS		
Carter Plans Conservation Project in Magnolia Field	3-24	63
Arkansas is Proving Ground for Many New Practices Over the Past Eight Years—Kenneth B. Barnes	4-21	102
Haynesville Plant Dedication Scheduled for June 1	5-19	106
Well-Completion Methods in Ark-La-Tex Area—Paul Reed	7-14	130
Probable Demand for Pumping Units, 1945	7-28	120
Pressure Maintenance by Water Injection, Midway Field, Arkansas—William L. Horner	11-17	185
CALIFORNIA		
California Receiving 100,000 Bbl. Outside Oil	2-24	107
Proposed Exploratory Work Would Help Determine Extent of Elk Hills Reserve—L. P. Stockman	2-24	157
California A.P.I. Meet Hears Discussion of Demand, Reserves—L. P. Stockman	4- 7	64
Oil-Well Casing Failures—R. J. Kettenburg and F. R. Schmieder	4-14	116
Navy Seeks 64 New Wells in Elk Hills Naval Reserve	5- 5	74
Elk Hills Production Near Maximum Limit	5- 5	79
Committee Told Government Has No Claim to Coastal Oil Deposits	6-23	73
PAW Committee Studying Texas-California Project	6-30	138
Elk Hills Emergency Extended	7- 7	63
Extreme Precautions Taken in Drilling Well in Downtown Los Angeles—Kenneth B. Barnes	7-21	102
Probable Demand for Pumping Units, 1945	7-28	120
California Spacing Rules Are Relaxed to Secure Crude	8- 4	54
Paloma Unit—An Advanced Oil, Gas, and Products Producing Operation—Part 1—Kenneth B. Barnes	8-18	112
Production Curtailment, Work-Week Revision, Begun in California—L. P. Stockman	9- 1	40
El Paso Natural Planning Texas-California Gas Pipe Line—Paul Reed	9- 1	44
Navy to Consider Elk Hills Shutdown	9- 8	84
California Reducing Crude-Oil Output	10- 6	69
New Zone in Wilmington May Increase Reserve 25,000,000 Bbl.—L. P. Stockman	11- 3	62
Wells Slanted Out 3,700 Feet Tap Under-Ocean Pool—Kenneth B. Barnes	11- 3	82
Week's Highlights (Geol.)	12- 8	129
Schist Production is New Development at Edison—L. P. Stockman	12-29	165
COLORADO		
Week's Highlights (Geol.)	1- 6	95
Week's Highlights (Geol.)	2-10	133
Week's Highlights (Geol.)	6-16	159
Probable Demand for Pumping Units, 1945	7-28	120
Rangely, One-Time Shallow Field, Now Rocky Mountains' Most Active Area—C. R. Thomas	11-24	90
Difficult Drilling and High Costs Attend Development of Rangely Field—Neil Williams	12-22	44
EASTERN		
Bradford Reserves Judged at 80-90 Million Barrels	5-19	98
Northern Ordnance Sells Pennsylvania Property	7-14	84
Probable Demand for Pumping Units, 1945	7-28	120
Water Injection in the Chatham Field, Medina County, Ohio—Richard B. Lyon and Jack Cashell	9- 1	58
FLORIDA AND SOUTH GEORGIA		
New Drilling Problems Face Operators in Everglades District of Florida—Neil Williams	1- 6	44
Week's Highlights (Geol.)	5-26	181
Georgia Plans to Establish Conservation Measures	6-23	72
Georgia's New Commission Discusses Rules for State	6-30	81
Probable Demand for Pumping Units, 1945	7-28	120
Georgia Commission to Discuss Conservation Rules	8- 4	54
Florida Exploration Campaign Expands	9-22	161
ILLINOIS-INDIANA		
Utilization of Salt Water in Illinois Oil Fields—Samuel F. Peterson	1-13	69
Examples of Fitting Production Program to Pool Conditions in Illinois Basin—Kenneth B. Barnes	2- 3	42
Probable Demand for Pumping Units, 1945	7-28	120
Week's Highlights (Geol.)	11- 3	137
KANSAS-NEBRASKA		
Water-Flood Operations Automatically Controlled in Eastern Kansas—Frank B. Taylor	2-17	89

	Date	Page
Hot Oil From Portable Heater Recirculated to Control Paraffin—Frank B. Taylor	4-14	134
Week's Highlights (Geol.)	4-28	167
Hugoton Classified as "Restricted Area," Curbing New-Well Drilling	5- 5	70
Radioactivity Well Logging—V. J. Mercier	5- 5	90
Northern Natural (Kansas) Contracts Go to Anderson Brothers	6-30	137
Probable Demand for Pumping Units, 1945	7-28	120
KENTUCKY		
Probable Demand for Pumping Units, 1945	7-28	120
LOUISIANA		
Provision of Drilling Sites Poses Difficult Engineering Problems in Louisiana Field—Neil Williams	1-20	72
Week's Highlights (Geol.)	2- 3	85
Erath Cycling Operation	3-17	65
Lake St. John Field Served by Central High-Pressure Gas System—Neil Williams	4- 7	74
Haynesville Plant Dedication Scheduled for June 1	5-19	106
Special Technique Promises to Change Future Lime-Completion Practices (Includes Haynesville Field and Production Data)—Paul Reed	5-19	137
Fully Equipped Floating Tank Batteries Used in Coastal Louisiana Operations—E. H. Short, Jr.	5-26	120
Preparing Swamp Locations in Coastal Louisiana—Neil Williams	6- 9	93
Committee Told Government Has No Claim to Coastal Oil Deposits	6-23	73
Sun to Build Line From Delhi Field to Terminal	6-30	137
Louisiana Plans to Oppose Kansas-to-Michigan Line	7- 7	135
Well-Completion Methods in Ark-La-Tex Area—Paul Reed	7-14	130
Week's Highlights (Geol.)	7-21	167
Probable Demand for Pumping Units, 1945	7-28	120
Week's Highlights (Geol.)	9- 8	129
Witnesses Tell FPC Louisiana's Gas Resources Are Jeopardized	11-24	84
FPC Hears Divergent Views in Gas Investigation at New Orleans	12- 1	46
Louisiana's Gasoline Tax $239,776,748 in 24 Years	12- 8	122
MICHIGAN		
Probable Demand for Pumping Units, 1945	7-28	120
Sohio to Provide Dow With Gas From Coldwater Field	8-11	137
Injection of Water Into Underground Reservoirs in Michigan—W. E. Schoeneck	11-17	193
MISSISSIPPI-ALABAMA		
Mississippi Engineering Committee Establishes Operational Procedure	2- 3	31
Treatment of Heavy Oil Emulsions in Mississippi Field Presents Problems—Neil Williams	2- 3	59
New Lines Enhance Mississippi Outlet	2-17	132
Interstate Plans Route of Mississippi Outlet	2-17	132
Week's Highlights (Geol.)	2-17	135
Geological Eccentricities in Mississippi Pose Completion and Production Problems—Neil Williams	2-24	124
Completion Practices in Heidelberg Field Are Undergoing State of Evolution—Neil Williams	3- 3	50
Week's Highlights (Geol.)	3-17	143
Precautions in Drilling Control Aid Deep Development at Cranfield—Neil Williams	4-14	102
Mississippi Drilling Activity at New High With 80 Rigs Now Running in State—Neil Williams	4-21	92
Week's Highlights (Geol.)	5- 5	131
Week's Highlights (Geol.)	6- 9	127
Week's Highlights (Geol.-Miss.)	6-23	147
Probable Demand for Pumping Units, 1945	7-28	120
Work Started on First Oil Refinery in Mississippi	8-11	128
Mississippi Issues State Well-Spacing Regulations	9- 8	84
Week's Highlights (Geol.-Miss.)	9-29	157
Mississippi's Oil Industry Employs 13,000 Persons	10- 6	72
NEW MEXICO		
Week's Highlights (Geol.)	2-24	179
Week's Highlights (Geol.)	4-14	159
Journalog (Discovery Well, Ellenburger Production, Rhodes Field, Lea County, New Mexico)	4-21	143
Maljamar Cooperative Repressuring Project Covers Many Operational Phases—Kenneth B. Barnes	6-30	90
Maljamar Repressuring Plant Expanded in Logical Steps—Kenneth B. Barnes	7- 7	104
Probable Demand for Pumping Units, 1945	7-28	120
El Paso Natural Planning Texas-California Gas Pipe Line—Paul Reed	9- 1	44
NORTH CAROLINA		
Drilling Scheduled for Two North Carolina Tests	1-13	119
North Carolina's Oil Exploration Continuing	8-18	110
OKLAHOMA		
Commission Amends Basic Order for Hugoton Field	1- 6	88
East Pauls Valley Pool Presents Study of Modern Drilling and Completion Practices—Paul Reed	1-13	58
Week's Highlights (Geol.)	1-13	105
Week's Highlights (West Edmond)	1-27	283
West Edmond Conditions Show Possibilities of Increasing Recovery by Pressure Maintenance—Kenneth B. Barnes	3- 3	44
Oklahoma House Passes Unitization Bill	4-14	92
Oklahoma Operators Acclaim Unitization Law as Forward Step	4-28	100
West Edmond Pool to Have Water-Flooding Operation	4-28	107
Hugoton Classified as "Restricted Area," Curbing New-Well Drilling	5- 5	70
Week's Highlights (Geol.)	5-12	153
Week's Highlights (Geol.)	6- 2	115
Probable Demand for Pumping Units, 1945	7-28	120
Week's Highlights (Geol.)	8- 4	121
Week's Highlights (Cimarron County)	8-11	139
Week's Highlights (Geol.)	10-13	161
Oklahoma at Important Threshold With New Deep Pools—Kenneth B. Barnes	12- 8	76
Week's Highlights (Geol.)	12-22	109
OREGON		
Exploration in Pacific Northwest Draws Interest	8-11	82
Week's Highlights (Geol.)	9- 1	105
ROCKY MOUNTAIN		
PAW Approves Sinclair Lines in Wyoming	1-20	99
Montana Considering Compact Membership	2-10	60
Seven Operating Firms Form Elk Basin Unit	2-10	62
Vigorous Exploratory Play Focuses Attention on Rocky Mountain Area—Charles J. Deegan	3-10	41
Journalog (Discovery Well of Sand Draw Field)	3-10	85
Lease Sale Indicates Interest in Black Oil	3-17	56
Important Developments in Rockies Center Around Four Great Basins—Charles J. Deegan	3-17	58
Week's Highlights (Geol.)	3-24	113
Electrical Logging Widely Employed in Rocky Mountain Exploratory Tests—Charles J. Deegan	4- 7	60
Expanded Development Program in Prospect for Colorado's Rangely Field	4-14	96
Bids Received for Dry-Ice Land in New Mexico	5- 5	79
Montana is Fourteenth Member of Oil Compact	5-19	106
Week's Highlights (Geol.-Colorado)	6-16	159
Permit Granted for 68-Mile Oil Line in Wyoming	6-30	137
Week's Highlights (Geol.)	7-14	151
Probable Demand for Pumping Units, 1945	7-28	120
Orderly Shift to Peacetime Economy in Mountain Region—T. R. Ingram	9- 1	40
Week's Highlights (Wyo.-Geol.)	10- 6	133
Week's Highlights (Geol.)	10-27	147
Rangely, One-Time Shallow Field, Now Rocky Mountains' Most Active Area—C. R. Thomas	11-24	90
Week's Highlights (Geol.)	12- 1	117
Difficult Drilling and High Costs Attend Development of Rangely Field—Neil Williams	12-22	44
TEXAS, GENERAL		
Only 2 Per Cent of Gas is Wasted, Says Thompson	1- 6	88
Probable Demand for Pumping Units, 1945	7-28	120
Texas Cycling Operations Increase 15 Fold During Past 7 Years—E. H. Short, Jr.	8-18	120
Texas' Gas-Conservation Committee Starts Functions	11-10	56
Texans Urged to Conserve Their Gas Resources	12-15	131
EAST TEXAS		
Carthage Area Holds Promise of Becoming World's Largest Gas Reserve—Neil Williams	5-19	102
Well-Completion Methods in Ark-La-Tex Area—Paul Reed	7-14	130
Probable Demand for Pumping Units, 1945	7-28	120
Lone Star to Build Cycling Plant in Chapel Hill Area	8- 4	117
Determining Weighted Average Bottom-Hole Pressure in East Texas Field—L. J. Meyer	12- 1	67
United Permitted to Move More Gas From Carthage	12-15	131
Selective Acidization Procedures at Carthage Field Result in Greater Productivity—Larger Ultimate Recovery—Neil Williams	12-22	56
TEXAS GULF COAST		
World's Longest String of 7-Inch Casing is Set in Gulf Coast Well—E. H. Short, Jr.	4-14	113
Giles Calls It "Unwarranted Attack Upon State's Rights (Submerged land abutting Texas)	6- 9	78
Committee Told Government Has No Claim to Coastal Oil Deposits	6-23	73
Probable Demand for Pumping Units, 1945	7-28	120
Phillips Testing World's Deepest Well	8-18	98
Conroe Field Presents Good Example of Benefits of Conservation Principles—Charles J. Deegan	10- 6	100
Lake Creek Cycling Project Example of Applied Engineering Technique—E. H. Short, Jr.	12- 1	64
NORTH TEXAS		
Probable Demand for Pumping Units, 1945	7-28	120
PANHANDLE		
Mammoth Gas-Repressuring Project to Start in West Pampa Pool—Kenneth B. Barnes	2-10	74
Probable Demand for Pumping Units, 1945	7-28	120
SOUTHWEST TEXAS		
Probable Demand for Pumping Units, 1945	7-28	120

XUM

	Date	Page
Seeligson Field Outstanding on Several Counts, Especially Its Multiple Pay Zones—Charles J. Deegan	8-11	74
WEST CENTRAL TEXAS		
Ellenburger of Central Texas is Studied	6-30	81
Probable Demand for Pumping Units, 1945	7-28	120
WEST TEXAS		
Week's Highlights (Geol.)	2-24	179
Week's Highlights (Geol.)	3-10	101
Week's Highlights (Geol.)	4-21	157
Permian Basin Residue Gas to Be Burned for Carbon Black	5- 5	122
Journalog (Discovery Well, TXL Field, Ector County, Texas)	5-19	155
Week's Highlights (Geol.)	5-19	167
Fullerton Pool is Guidepost in Developing Clear Fork and Devonian Reserves—Kenneth B. Barnes	6- 2	69
Multistage Acidization Increases Recovery and Productivity From Multizone Wells—Kenneth B. Barnes	6- 9	99
Week's Highlights (Geol.)	7- 7	137
Probable Demand for Pumping Units, 1945	7-28	120
El Paso Natural Planning Texas-California Gas Pipe Line—Paul Reed	9- 1	44
Week's Highlights (Geol.)	12-15	139

Foreign

	Date	Page
ALASKA		
Petroliferous Provinces in Alaska Justify Additional Exploration	2-10	70
Alaska Scene of Intensive Oil Investigation During 1944	2-17	80
Navy May Get $1,120,000 for Alaskan Oil Operations	4-28	99
Canol Disposal to Be Supervised by Army	4-28	102
Navy Begins Drilling Test Well in Northern Alaska	8-18	105
ALBANIA		
Repairs to Albanian Oil Facilities Progressing	12-22	46
ANGLO-AMERICAN AND OIL PACT (also see Foreign under ECONOMICS)		
Oil-Pact Differences May Be Ironed Out Before PIWC	1- 6	36
Anglo-American Oil Pact Withdrawn From Senate	1-20	48
Agreement Reached on Revised International Oil Pact	1-27	164
Antitrust Protection Only Issue Remaining in Revised Pact	2- 3	30
White House Urgency Note May Speed International-Oil Pact	2-24	112
Pact's Antitrust Aspects Still Under Discussion	3- 3	46
Revised Pact is Sent to Committee	3- 3	40
Congress May Be Asked to Define Immunity Under Pact	4-28	107
Revised Oil Treaty Satisfactory to Industry and Government	5-19	98
Oil Industry Asks Freedom to Operate in Foreign Lands	5-26	108
Ickes to Negotiate Anglo-American Pact (Truman Announcement)	7-14	85
Negotiations on New Anglo-U. S. Treaty Will Open September 17	9-15	73
Revising Anglo-U. S. Petroleum Treaty—C. O. Willson	9-22	160
Journal Editor Reports on Revised Oil Pact Signed in London (Article accompanied by Complete Text of Revised Agreement)—C. O. Willson	9-29	84
Britons Suggest Scope of Bilateral Oil Pact Should Be Expanded—C. O. Willson	10- 6	68
Senate Action on Oil Treaty Expected Soon	10-20	109
Senate Committee Expected to Hold Hearings on Oil Pact—Henry D. Ralph	11-17	156
Texans Brand Oil Pact as Violation of Sovereign State Rights	11-17	156
Davies Corrects Misconceptions in Oil-Treaty Language	11-24	86
ARGENTINE		
Cracking of Latin American Crude Oils—No. 7—Argentine—Dr. Gustav Egloff	1-13	73
Argentine Operations Severely Reduced	2- 3	27
Cracking of Latin American Crude Oils—No. 8 (Reforming Argentine Gasoline and Naphtha)—Dr. Gustav Egloff	2-10	107
Lack of Equipment Lowers Argentine Production	3-24	66
Bahamas Authorize Petroleum Exploration	4-28	102
Argentina to Receive Fuel Oil in Return for Seeds	5-26	175
Argentine Oil Production Registers Slight Drop	6- 9	76
Argentina Gets 200,000 Bbl. of Fuel Oil Under Plan	8-11	127
Argentina's San Pedro Field Extended North	9- 1	46
South American Exploration Activity in Full Swing, Journal Representative Finds—Kenneth J. Langley	9-15	60
Crude Output in Argentina Shows 5.9 Per Cent Drop	12- 1	50
Argentina Production Declines 5.6 Per Cent	12-22	46
AUSTRALIA		
More Products From Glen Davis Oil Shale Planned	4- 7	113
Oil-Refining Project for Australia Announced	11-24	159
BOGOTA		
Period of Exploitation for Tropical Ends in 1951	9-15	66
BOLIVIA		
Bolivia Seeking Materials to Expand Petroleum Operations	1- 6	33
Bolivia Takes Initial Steps in Oil-Refinery Program	1- 6	89
First-Quarter Oil Output in Bolivia 75,680 Bbl.	6- 9	76
South American Exploration Activity in Full Swing, Journal Representative Finds—Kenneth J. Langley	9-15	60
BORNEO		
Borneo Oil Plans Obscured by Reticence of Military Forces	7-21	95
Navy Discounts Aid From Borneo Oil Fields	8-11	72
BRAZIL		
South American Exploration Activity in Full Swing, Journal Representative Finds—Kenneth J. Langley	9-15	60
New Distillation Unit Authorized in Brazil	12-22	46
Brazil Shows Good Geologic Possibilities of Commercial Quantities of Petroleum—Kenneth J. Langley	12-29	162
BURMA		
Central Burma Oil Field in Allied Army Path	4-28	104
Burma Refineries Resume Limited Operations	7-21	98
Ceylon's Imports of Fuel Oil Rise in Second Quarter	12- 8	66
CANADA		
Panhandle Eastern to Sell Gas in Canada	1-	66
Sun Acquires Exploration Rights in Alberta, Canada	2- 3	32
Army to Close Most of Its Canol Project by June 3	3-17	55
Army Decides to Abandon Canol Immediately	3-24	56
Operating Refineries in Canada, Capacities and Locations	3-31	301
Drilling Resumed at Deep Prince Edward Island Test	5-26	116
Turner Valley Fields Gets First Gas-Repressuring Program—J. A. McCutchin	6- 9	89
FPC Postpones Panhandle Eastern Gas (to Canada) Hearing	6-30	137
Socony-Vacuum Foreign Affiliates Are Active	7-14	92
Nova Scotia Wildcat Drilling Below 6,000 Ft.	10- 6	82
Gas Reserves Developed in Saskatchewan Field	10- 6	126
Week's Highlights (Alberta, Geol.)	11-10	127
Week's Highlights (Geol.)	11-24	165
Possibilities of Canol Area Explored by Imperial Oil	12- 1	48
Large Exploration Campaign Under Way in Canada—Charles J. Deegan	12-29	274
CHILE		
Texans Hope to Open New Oil Field for Chile	8- 4	62
International Will Increase Drilling in Peru, Chile, and Ecuador	12-29	236
CHINA		
India-China Line to Aid War Against Japs	2-17	133
India Line to Deliver to Kunming, China, Soon	3- 3	98
Plans Adopted to Develop China's Oil Reserves	5- 5	76
Products Reach China Through Army Line	5-12	150
China Line Laid Under Combat Conditions	5-19	164
Chinese Oil Problem Studied by PAW Official	5-26	116
China Plans 900-Mile Yumen-Kwangyuen Line	7-14	148
China Plans 1,000-Mile Yumen-Kwangyuen Line	8-25	154
Future of China Line Awaits Decisions	11-17	301
War's End Brings Accelerated Activity in Yumen, China's Only Oil Field—K. C. Lu	12-29	253
COLOMBIA		
Shell to Start Exploitation of Colombian Oil Fields	2-17	79
New Cantagallo Well Started; One Testing (Colombian)	5-26	116
Colombian Improvement in 1944 Production Confirmed by Final Data	5-26	116
Two Refineries Proposed on Colombia Coastline	6-16	98
Dr. Guzman Heads Colombian Department of Petroleum	6-16	98
Oil From Casabe Flowing to Pacific War Zone	6-23	80
Socony-Vacuum Starts Magdalena Valley Test	6-30	84
Three Companies Join in Forming Tri-Pet Corp. Foreign Unit	7- 7	66
Texas Petroleum Co. Ready to Drill Colombian Test	7- 7	66
Tropical Seeks to Extend Casabe Pool	7-14	92
Socony-Vacuum Foreign Affiliates Are Active	7-14	92
Colombian Oil-Law Changes Considered	7-14	92

	Date	Page
Casabe Pay Proven Under Tropical's DeMares Pool	8-11	78
Colombian Exploration Costs Are Revealed	8-11	78
Sixth Dificil Well Sets Production Record	8-25	102
Socony-Vacuum Reports on 14 Active Operations	9- 8	148
South American Exploration Activity in Full Swing, Journal Representative Finds—Kenneth J. Langley	9-15	60
New Catalytic Plant Possible for Colombia	9-15	66
Two Important Tests Starting in Colombia	9-29	90
Shell Oil Activity Spreads in Colombia Through Three Geographic Regions, Five Subsidiary Companies	10- 6	82
Richmond Petroleum Co. and Petroleos Ariguani S.A. Start Wildcats	10- 6	82
Shell's Colombian Wildcat Reports Show	11-17	168
Colombia's Oil Bill Under Discussion by Committee	12- 1	50
Oil Industry to Finance Penal Institutions	12- 8	66
Operators in Colombia Protest Changes in Law	12-22	46
Colombia Has 26 Active Drilling Operations	12-22	46
Colombian's Operations in Barco Concession Continue Expansion	12-29	245
Applications for Concessions in Colombia Cover 40 Million Acres—Kenneth J. Langley	12-29	245
Government Reports on Shell Refinery Plans	12-29	274
CUBA		
Cuba's Newest Field Contains 14 Producers	6- 9	76
Another Serpentine Discovery for Cuba	7-14	96
Geophysical Parties Active in Cuban Areas	8-18	102
DUTCH EAST INDIES		
Valuable East Indian Oil Fields Wrested From Japanese Army	7- 7	64
Shell's N.E.I. Reconstruction Plans Fully Formed	8-11	78
Heavy Damage Suffered by Balikpapan Refineries	9- 1	99
Dutch East Indies Plants Suffer Heavy Damage	10-20	169
Oil Production Resumes on Tarakan	11- 8	66
DUTCH WEST INDIES		
Aviation-Gasoline Unit Approved for Curacao	4-21	96
Aruba Refinery Runs Raised 32 Per Cent	5- 5	76
Second Aruba Refinery Resumes Operations	6-16	98
Aruba Refinery Increases Output of Many Products	8- 4	62
Curacao Refinery to Lift Aviation Fuel Yield	8-18	102
South American Exploration Activity in Full Swing, Journal Representative Finds—Kenneth J. Langley	9-15	60
ECUADOR		
Ecuador and Peru Confirm 1942 Boundary Agreement	8- 4	62
South American Exploration Activity in Full Swing, Journal Representative Finds—Kenneth J. Langley	9-15	60
International Will Increase Drilling in Peru, Chile, and Ecuador	12-29	236
EGYPT		
Anglo-Egyptian Nearly Doubled Production During War	9- 1	46
South Mediterranean is Withdrawing From Egypt	9-22	166
Egyptian Exploration is Being Conducted on Broadest Front in History—C. O. Willson	12- 1	56
Only Production in Egypt Comes From Two Fields on Suez Gulf Shores—C. O. Willson	12- 8	62
ENGLAND		
British Pipe-Line System Handling 100,000 Bbl. Daily	1-27	167
Britain's Oil Production is Far Below Requirements	12- 1	50
British Will Permit Purchases of Equipment in United States	12- 8	60
British Loan Will Aid Export of Oil Equipment	12-22	42
ETHIOPIA		
Ethiopian Empire Grants Concession to Sinclair	9-15	66
FRANCE		
France Needs Oil Products and Refinery Equipment	1- 6	89
French Seek Crude to Resume Refining	3-31	161
Standard Oil Properties in Europe Heavily Damaged	6-16	98
French Try to Restore Marseille Refineries	7-21	98
French Oil Industry Slowly Emerging From War's Wreckage (Includes status of all plants)—C. O. Willson	11-10	73
U. S. to Remove Lines in France	12- 8	127
GERMANY		
Russian Advance Sweeps Over Important Nazi Oil Sources—Henry D. Ralph	2- 3	26
Whittling-Down Process Continues Against German Oil Supply	2-24	107
Air Destruction of Nazi Oil Supply Disclosed by Arnold	3- 3	40
Inventory Must Supply Part of Second-Quarter Steel Needs	3- 3	40
German Oil Supply Now Reduced to One-Fourth That of Year Ago—Henry D. Ralph	3-31	164
Germany's Gasoline Output is Slashed 96 Per Cent	4-28	99
Army Operates Six Lines Across Rhine	5-12	150
Russell Relates How Germany Gambled Desperately for Oil	11- 3	67
Technical Oil Mission Studies German Petroleum Research Activities—W. J. Schroeder	11-24	112
FEA Recommends Elimination of German Synthetic-Fuel Industry	12-29	155
ITALY		
Standard Oil Properties in Europe Heavily Damaged	6-16	98
Methane-Gas Plants in North Italy Repaired	8- 4	62
Italian Refineries Are Being Returned to Service	8-18	102
JAPAN		
Japs Say They're Making Gasoline From Pine Sap	1- 6	89
Oil Technicians Developed Bomb That Blasted Tokyo	3-24	110
Oil Greases the Road to Tokyo—Henry D. Ralph	5-19	99
Jap Oil Centers Subjected to Crushing Air Attack	5-19	100
Jap Oil Resources More Abundant Than Realized	8-25	102
Postwar Investigation Reveals Jap Oil Shortage	11-10	71
MEXICO		
Three Promising Oil Areas in Mexico to Be Explored	1-13	49
Reynosa Plans to Pipe Gas From Texas to Mexico	1-13	102
Mexico's Oil Budget Looks to Expansion in 1945	1-20	55
Plan for New Gas Line to Mexico Stirs Protest	3- 3	98
Operating Refineries in Mexico, Capacities and Locations	3-31	301
Paraffin-Wax Exports to Mexico Restricted	4-21	96
Mexico City Refinery to Be Completed Late This Year	4-28	104
Poza Rica Well Comes in Flowing 8,500 Bbl. Daily	4-28	104
Machinery for Developing Fields Reaches Mexico	5-26	116
Mexicans Protest Against Hiring American Drillers	6-16	98
Oil Production Rises, But Exports Fall, in Mexico	6-23	80
Mexican High-Octane Plant to Be Ready in December	6-30	84
Mexico Seeks to Increase Oil Output 10,000,000 Bbl.	7- 7	66
High Grade Oil Found on Island of Las Isabelas	7- 7	66
Advocates of Mexican Line Appeal to R. R. Commission	7-21	164
Project Seeks to Give Gas to Northern Mexico	8-11	132
Mexican Geologist Holds North Prospects Good	8-18	102
Mexican Delegates to Visit Research Laboratories	9- 1	46
Mexican Wildcat Producer Wakens Sleeping Industry	9- 8	80
Production to Be Resumed at Mexican Oil Wells	12- 1	50
British-Mexican Oil-Property Dispute is Due for Airing	12- 8	60
Mexico Pays United States Installment of $2,500,000	12- 8	66
Mexico's Oil Production Increases 20 Per Cent	12- 8	66
Great Progress Recorded in 1945 in Mexico's Program of Streamlining Oil Industry—Curtis Vinson	12-29	197
Mexico Production and Well Completions Data, by Fields, With Daily Averages, for Five-Year Period, 1940 Through 1944, With All-Time Production by Fields (Tables)	12-29	210
Sulfide Corrosion Complicates Tank-Cleaning Operation in Tampico Refinery—Fabian R. Staley	12-29	250
Mexico Pays Installment on Expropriated Properties	12-29	284
MIDDLE EAST		
Arabian Peace Delegates to Tour Oil Districts	4-21	96
Rodgers Confirms Plans for Arabian Pipe Line	4-28	100
Drilling to Be Resumed on Kuwait Concession	4-28	104
Kuwait to Furnish Oil to French Refineries	5-12	86
New Field Discovered in Arabia	5-12	86
Journal Editor to Report on Oil Activities in Middle East Area	6-23	73
Kuwait Oil Shipments to Start Early Next Year	6-23	80
Lend-Lease Aid Will Be Continued to Saudi Arabia	7- 7	66
Arabian American to Build Line to Mediterranean	8- 4	62
French Satisfied With Plan for Refineries in Levant	8-11	78
Operations Recently Resumed in Kuwait Following Total Shutdown Caused by War—C. O. Willson	8-18	96
Iraq Lets Contract for 16-In. Pipe	9-15	133
Anglo-Iranian is World's Largest Single Integrated Operation in the Industry—C. O. Willson	9-22	169
Arabian American Starts Operation of New Plant at Saudi Arabia	9-29	150
Five Fields With 51 Wells in Iran Produce Total of 365,000 Bbl. of Crude Daily—C. O. Willson		
Products of Industry's Largest Manufacturing Unit (Anglo-Iranian Oil Co., Ltd., Persian Gulf) Have Widespread Distribution—C. O. Willson	10-13	86
Bahrein Island Produces 20,000 Bbl. and Refines 70,000 Bbl. Per Day—C. O. Willson	10-20	110
Arabian Line Terminal at Haifa	10-20	174
Bahrein Concession Development Based on Maximum Recovery by Natural Flow—C. O. Willson	10-27	98
Saudi Arabian Petroleum Operations Are Rapidly Reaching Major Proportions—C. O. Willson	11- 3	70
Construction Program Under Way in Iraq Will Triple Present Crude Output—C. O. Willson	11-10	60
90,000-Barrel Haifa Refinery Largest in Mediterranean Area—C. O. Willson	11-17	160
Plan for Oil Refinery in Tripoli is Ratified	12- 8	66
Plans Under Way to Make Qatar a Major Source of Petroleum—C. O. Willson	12-15	80
Iranian Oil Production Set New Record in 1944	12-22	46
Lebanese Chamber to Consider New Refineries	12-22	46
The Middle East, Its Present and Future—C. O. Willson	12-29	183
Map of Principal Oil Operations in the Middle East	12-29	186
Reserves of Middle East (Table)	12-29	185
Summary of Middle East Field Operations (Table)	12-29	190

XUM

	Date	Page
Refineries of the Middle East (Table)	12-29	190
Water Invasion Controlled by Gas Injection in Bahrein Island Operations	12-29	286
PANAMA		
Sinclair Seeks Exploration Privileges in Panama	9-15	66
Panama Facilities Near Completion	9-15	132
Permission Sought to Explore in Panama	12-22	46
PARAGUAY		
Union Doing Geophysical Work in Paraguay	8-11	78
South American Exploration Activity in Full Swing, Journal Representative Finds—Kenneth J. Langley	9-15	60
PERU		
Peruvian Blue Goose Now Exporting Oil to Brazil	6-16	98
Increase for Peruvian Production in Prospect	7-14	92
Ecuador and Peru Confirm 1942 Boundary Agreement	8- 4	62
South American Exploration Activity in Full Swing, Journal Representative Finds—Kenneth J. Langley	9-15	60
International Will Increase Drilling in Peru, Chile, and Ecuador	12-29	236
PHILIPPINES		
Philippine Exploration to Be Resumed	12-22	46
NETHERLANDS		
Small Netherlands Field Discovered During War	7-14	92
One Netherland Well Yields 260 Bbl. Daily	9-15	66
NORWAY		
Norway Has Oil Products for Its Immediate Needs	12- 8	66
ROMANIA		
U. S. to Probe Removal of Equipment From Romania to Russia	1- 6	33
Oil Operations Resumed in Romania on Limited Scale	3- 3	41
Romania Using American Oil to Pay Soviet Claims	7- 7	66
Removal of Tools Impedes Oil Work in Romania	8-18	102
RUSSIA		
U. S. to Probe Removal of Equipment From Romania to Russia	1- 6	33
U.S.S.R. May Renew Exports of Oil	4-14	100
Soviet Government Orders 20 Portable Oil Rigs	5-26	116
Soviet Engineers Start Saratov-Moscow Line	7-21	164
Moscow Reports Rich Oil Reservoir Under Caspian Sea	9- 1	46
Russia Orders Compressors for Natural-Gas Pipe Line	9-15	133
Poland Signs Agreement to Import Russian Crude	12- 1	50
TRINIDAD		
Premier (Trinidad) Plans New Plant, Deeper Drilling	9- 8	80
South American Exploration Activity in Full Swing, Journal Representative Finds—Kenneth J. Langley	9-15	60
Trinidad Leasehold's Daily Production 19,296 Bbl.	11-10	55
TURKEY		
Turkey Seeks Oil From Anglo-American Group	7-28	112
URUGUAY		
South American Exploration Activity in Full Swing, Journal Representative Finds—Kenneth J. Langley	9-15	60
VENEZUELA		
Standard of California Gets Venezuelan Concessions	1-20	50
Capacity Raised on Sinclair Venezuela Line	1-20	98
Socony-Vacuum Barinas Wildcat Test Progressing	2-10	62
Atlantic Launches Program to Become Venezuela Producer—N. O. Fanning	2-17	75
Venezuela Sets New Record in Crude-Oil Production	3-10	46
Sinclair Affiliate to Build Combination in Venezuela	3-17	139
Creole Plans for Venezuelan Refinery Are Progressing	3-31	161
Pantepec Says 50 Wells to Be Drilled in Mulata Field	4-21	96
Sinclair Seeks Concessions in Venezuelan Areas	4-21	96
Creole's Venezuelan Production Rising	4-28	104
Four Venezuelan Wells Near Completion Stage	5- 5	76
Shell Picks Site for Venezuelan Refinery	5- 5	76
Venezuela's Production Increased 43 Per Cent	5- 5	76
Creole's Production in Venezuela Continues Rise	5-26	116
Venezuelan Production Up 36.2 Per Cent	6- 9	76
Table on Production of Crude Petroleum in Venezuela by Companies for the Year 1944	6- 9	77
Creole Completions Show Rise in Drilling Activity	6-30	84
S. A. Petrolera las Mercedes Pushes Drilling Program in Venezuela	6-30	84
Venezuela Engineer Heads Phillips Land Department	7-14	92
Socony-Vacuum Foreign Affiliates Are Active	7-14	92
Venezuela May Refine Its Own Oil Within 3 Years	7-14	143
Pressure-Maintenance Plants Are Proposed	7-21	98
Eastern Venezuelan Fields Show Big Gain (1943-1944 data)	7-21	98
Marian Cody Appointed Latin-American Journal editorial representative	7-28	112
New Venezuelan Field Discovered by Creole	7-28	112
Venezuela Production Record—958,394 Bbl. Daily	7-28	112
Deepest Test Suspends Drilling at 13,033 Ft.	7-28	112
Selection of Venezuela Refinery Site Result of 2-Year Study	8- 4	55
Phillips Venezuelan Co. to Drill Three Travieso Wells	8- 4	62
Venezuelan Exploration Covers Extensive Area—Marian C. Cody	8-11	76
J. H. Loudon Made President of Caribbean Petroleum Co. in Venezuela	8-18	102
Socony Affiliates Testing Six Wells in Venezuela	8-18	102
Phillips Starts Operations in Venezuela—Marian C. Cody	8-25	100
Abnormal Demand Boosts Creole's Crude Production	8-25	102
Creole Venezuelan Well Completions Hold Steady	9- 1	46
Richmond Exploration Has Active Campaign Started in Venezuela—Marian C. Cody	9- 8	77
Preliminary Work Started on Venezuelan Refinery	9- 8	80
Socony-Vacuum Reports on 14 Active Operations	9- 8	148
South American Exploration Activity in Full Swing, Journal Representative Finds—Kenneth J. Langley	9-15	60
Pressure-Maintenance Plant Under Construction	9-15	66
Creole's Production Declines Slightly	9-22	166
Venezuelan Tectonic Map Being Prepared	9-29	90
Construction Projects Contracted in Venezuela	10-20	174
Venezuelan Minister Reassures Oil Men	10-27	78
Equipment Prepared for Contract in Venezuela	10-27	78
Drilling Suspended at 13,034 Ft. on South America's Deepest Test—Marian C. Cody	10-27	81
New Venezuelan Government to Respect Oil Law	11- 3	63
Guarico Road Project to Be Pushed	11- 3	134
Venezuelan Operations Are Normal, Following Revolt	11-17	157
New High in Oil Production Recorded in Venezuela	11-24	82
Oil Workers of Venezuela Get General Raise in Pay	12- 1	50
Dr. Juan P. Perez Alfonzo is New Venezuela Minister	12- 1	50
California Standard Starts Test Wells in Venezuela	12- 1	50
Demand for Venezuelan Oil in 1945 is Supplied Despite Some Complications—Marian C. Cody	12-29	215
Triple-Zone Completions in Eastern Venezuela	12-29	227
Venezuela's 1946 Exploratory Program Biggest in History	12-29	265
New Refinery Construction Under Way and Projected in Venezuela	12-29	273
Pipe-Line Expansion Program Continues	12-29	273
Modern Pressure-Maintenance Plants Being Built in Eastern Venezuela—Fabian R. Staley	12-29	276
Deep Potentialities to Be Tested at Amana, Venezuela	12-29	293

Personalities

	Date	Page
DRILLING		
W. C. Chonette, Shell Oil Co. of Canada, Ltd.	2- 3	100
Jim Stephens, drilling supt., Phillips Petroleum Co.	4-28	180
William T. Payne, pres., American Association of Oilwell Drilling Contractors	12- 1	132
EXPLORATION		
Pratt Selected as First Recipient of Sidney Powers Award	2-10	64
GAS-GASOLINE		
James E. Pew, director, Natural Gas-Natural Gasoline Division, PAW	5- 5	70
M. L. Arnold (Richfield Oil Corp.), pres., California Natural Gasoline Association	8-11	154
R. E. Heithecker, gas-utilization dept., Mid-Continent division, Seaboard Oil Co. of Delaware	8-18	186
M. W. Kibre, asst. mgr., gas department, General Petroleum Corp.	9-15	148
William W. Robinson, Jr., chief chemist, technical service and research laboratory, The Texas Co.'s Pacific Coast division	10-13	174
Walter C. Beckjord, pres., Cincinnati Gas & Electric Co.	12- 8	142
GENERAL		
Basil Hopper, vice-pres., Union Oil Co. of California	1- 6	90
Carter Oil Announces Several Promotions and Transfers	1-13	49
Jefferson Chemical Co. Names Top Engineers	1-13	98
Suman is vice-pres., Jersey Standard	2- 3	28
Several Changes Are Made in Humble's Official Family	2-24	111
Harold Decker, asst. mgr., American Production, Pipe Line and Gas Companies	2-24	197
Foote and Heald Promoted by Gulf	3- 3	42
E. G. McKeever, pres., Pan American Petroleum & Transport Co., Inc.	3- 3	116

	Date	Page
Dr. H. D. Wilde, manager of research and development, Humble Oil and Refining Co.	3-31	340
E. J. Mundy, Jr., sec. and asst. treas., Creole Petroleum Corp.	5-12	86
Harold D. Crawford, officer of Maloney Tank Manufacturing Co.	5-26	110
A. H. Weyland, vice-pres. and gen. mgr., Arkansas Fuel Oil Co. and associated companies	5-26	177
A. H. DeFriest, asst. to pres., Socony-Vacuum Oil Co.	6-16	176
W. F. Moore, gen. mgr. of foreign operations, The Texas Co.	7-28	190
Pew Brothers, Twin Pioneers in Oil Industry, at 75, Plan for Peace	9-29	98
Henry H. Hewetson, pres. Imperial Oil, Ltd.	10-27	164
R. G. Follis, pres., Standard Oil Co. of California	11-10	140
Allen L. Owens, managing director, Standard Oil Co. of Egypt	11-24	178
Bushrod Brush Howard, director, Standard Oil Co. (New Jersey)	12-15	156
Frank W. Abrams, vice-pres. and board chairman, Standard Oil Co. (New Jersey)	12-29	156
PIPE LINE		
Gilbert A. Manual, Williams Brothers Corp., operations, Houston district	1- 6	92
Interstate Pipeline Announces New Appointments	1-20	98
W. B. Fulton, chief engr., Interstate Oil Pipe Line Co.	1-27	280
Interstate Oil Pipe Line Officials Inspect Company's Facilities	3-24	60
William E. Honey, dist. mgr., Williams Brothers Corp.	6-23	144
Harry B. Britton, gen. supt., Plantation Pipe Line Co.	7-14	149
Martin E. Kilpatrick, pres., Southern Pipe Line Co.	11- 3	134
R. D. Gibbs, vice-pres., Union Oil Co.	11- 3	150
L. H. True, vice-pres., Magnolia Pipe Line Co.	11-17	301
J. J. Boyd, gen. mgr., O. E. Dempsey Construction Co.	12-15	135
Loren F. Kahle, pres., Interstate Oil Pipe Line Co.	12-29	352
PRODUCTION		
F. B. Bimel, vice-pres., International Petroleum Co., Ltd.	1-13	122
F. W. Floyd made head of Phillips Petroleum Co.'s Venezuela office	1-20	45
Dr. Rudolf J. Pfister, chief of oil-production research, Pennsylvania Grade Crude Oil Assn.	1-20	46
Max S. App, prod. dept., General Petroleum Corp.	1-27	300
Ivan G. Burrell, supt., Ohio Oil Co.'s Illinois division	2-17	150
Bowman Thomas, chief pet. engr., Humble Oil & Refining Co.	3-10	114
E. H. Eddleman, asst. mgr., Fleming Oil Co., Fort Worth	3-17	156
Horry F. Prioleau, executive vice-pres., Creole Petroleum Corp.	3-24	128
Carl E. Reistle, Jr., gen. supt., prod. dept., Humble Oil and Refining Co.	4-21	176
Max App, head, prod. dept., General Petroleum Corp.	5- 5	148
Omar A. Cavins, asst. gen. supt., prod. dept., northern dist., Standard Oil Co. of California	5-12	168
Jules E. Toussaint, gen. mgr., prod. dept., Standard Oil Co. of California	6- 2	132
G. L. Young, vice-pres., Signal Oil & Gas Co.	6- 9	142
L. W. Elliott, vice-pres. and director, Standard-Vacuum Oil Co.	6-23	80
D. H. Howard, prod. supt., Cities Service Gas Co.	6-23	160
Sam Harlan, vice-pres., Cities Service Oil Co. (Del.)	6-30	158
George O. Suman, prod. supt., San Joaquin Valley Dist., Tide Water Associated Oil Co.	7- 7	150
David L. Trax, staff engr., Gulf Oil Corp.	7-14	164
R. R. Shinn, asst. gen. supt. of prod., General Petroleum Corp.	8- 4	134
Ralph J. Schilthuis, Humble Oil & Refining Co., div. pet. engr., Southwest Texas	8-25	176
Harold W. Haight, prod. mgr., Creole Petroleum Corp., Caracas, Venezuela	9- 1	118
B. H. Robinson, gen. supt. of prod., General Petroleum Corp.	9-22	354
Oscar Rutho Burden, gen. supt., War Emergency Pipelines, Inc.	9-29	154
J. J. Mullane, asst. chief engr., Carter Oil Co.	9-29	170
Wilson B. Emery, director, The Ohio Oil Co., in charge of production operations	10- 6	148
E. L. Davis, gen. prod. supt., Signal Oil & Gas Co.	10-20	194
James Ogier Lewis, consulting petroleum geologist, Houston	11- 3	64
REFINING		
George R. Lord, vice-pres., Sinclair Refining Co.	1- 6	108
W. K. Bergen, supt., Toledo Refinery of Standard Oil Co. (Ohio)	1-20	96
Gale L. Adams, mgr., laboratory dept., General Petroleum Corp.	1-20	116
Dr. F. J. Sanders, Standard Oil Co. (Ohio) in charge of Cleveland refinery	2-10	122
John W. Duckett, refineries mgr., Sinclair Refining Co.	2-10	154
Staley Joins Journal Staff; Takes Over New York Editorial Office	3-17	56
Donald L. Ferguson, asst. mgr., New Jersey refineries of Standard Oil Company	3-17	137
William R. Argyle, asst. mgr. of refining, Sinclair Refining Co.	5-19	162
David W. Harris, pres., and B. R. Muirhead, treas., U.O.P.	5-26	110
Milton S. Beringer, gen. mgr., manufacturing dept., British American Oil Co., Ltd.	7-14	142
Walter D. Manz, gen. supt., Associated Refineries, Inc.	7-21	180
C. S. Teitsworth, chairman, manufacturing committee of Socony-Vacuum Oil Co.	9- 8	142
A. P. Frame, vice-pres., Petroleum Advisers, Inc.	11- 3	130
Charles Z. Hardwick, vice-pres., The Ohio Oil Co.	11-17	324
Louis D. Mann, vice-pres. and gen. mgr., Cities Service Refining Corp.	12-22	122
R. T. Haslam, vice-pres. and director, Standard Oil Co. (New Jersey)	12-29	156

Men Who Wrote for the Journal During 1945

Authors

	Date	Page
ALCOCK, E. D.		
Review and Analysis of Seismic Data (Abs.)	4-14	96
ANDERSON, E. K., VAIDEN, J. W., and O'REILLY, J.		
Solving Refining Problems in War and Postwar	3-31	283
ANDERSON, N. K., and STERBA, M. J.		
Simplified Catalytic Cracking Unit Meets Requirements of Smaller Refiners	12-22	77
ANDRESEN, KURT H., and DICKEY, PARKE A.		
Behavior of Water-Input Wells	11-17	205
ANDRUS, DON T.		
Secondary Recovery Research (I.P.A.A. Abs.)	10-20	105
ARNOLD, M. L.		
Vibration in Compressor Plant Piping	1- 6	54
ARNOLD, PHILIP M.		
Olefin Production by Thermal Cracking of Isobutane	7- 7	87
BACHLE, C. F.		
Turbines Plus Piston Engines (Abs.)	1-13	86
BARNES, KENNETH B.		
Oil and Gas Equipment Digest feature: Jan. 6, Jan. 20, Feb. 3, Feb. 17, Mar. 3, Mar. 17, Mar. 24, Apr. 14, Apr. 28, May 12, May 26, June 9, June 23, July 7, July 21, Aug. 4, Aug. 18, Sept. 1, Sept. 15, Sept. 29, Oct. 13, Oct. 27, Nov. 10, Nov. 24, Dec. 8, Dec. 22.		
Examples of Fitting Production Program to Pool Conditions in Illinois Basin	2- 3	42
Mammoth Gas-Repressuring Project to Start in West Pampa Pool	2-10	74
Portable Rotary Drill Cuts Giant Cores	2-17	111
West Edmond Conditions Show Possibilities of Increasing Recovery by Pressure Maintenance	3- 3	44
New Type Casing Shoes Pack Off Bottom of Hole During Cementing	3- 3	57
Six Different Engineering Methods Compared in Study of Pay Formations	4- 7	70
Arkansas is Proving Ground for Many New Practices over the Past Eight Years	4-21	102
Automatic Tank-Battery Switching Method Saves Time, Mileage, and Gas Waste	5-19	112
Fullerton Pool is Guidepost in Developing Clear Fork and Devonian Reserves	6- 2	69
Multistage Acidization Increases Recovery and Productivity From Multizone Wells	6- 9	99
Maljamar Cooperative Repressuring Project Covers Many Operational Phases	6-30	90
Maljamar Repressuring Plant Expanded in Logical Steps	7- 7	104
Automatic Well Controls and Two-Stage Separation Have Quick Payout	7-14	107
Extreme Precautions Taken in Drilling Well in Downtown Los Angeles	7-21	102
Power-Driven Tong is New Tool for Uniform, Efficient Tubing Jobs	7-28	146
San Miguelito is Outstanding Example of Modern Oil-Field Engineering	8-11	84
Paloma Unit—An Advanced Oil, Gas, and Products Producing Operation—Part 1	8-18	112
Paloma Unit—An Advanced Oil, Gas, and Products Producing Operation—Part 2	8-25	117
Paloma Unit—An Advanced Oil, Gas, and Products Producing Operation—Part 3	9- 8	97
Two 24-Cylinder, 2-Cycle Quad Diesel Units Drilled Oklahoma's Deepest Well	9-15	103
Geology of Acidizing (Engineering Fundamentals No. 205)	10-13	141
The Chemistry of Acidizing (Engineering Fundamentals No. 206)	10-20	163
Corrosion Inhibitor Promises Huge Returns (with Charles J. Deegan)	10-27	84
The Technique of Acidizing (Engineering Fundamentals No. 207)	10-27	129
Wells Slanted Out 3,700 Feet Tap Under-Ocean Pool	11- 3	82
Results of Acidizing (Engineering Fundamentals No. 208)	11- 3	123
Unitized Mobilized Drilling	11-10	76
Dissolving Mud Sheaths by Acidizing (Engineering Fundamentals No. 209)	11-10	109
Tests for Acid Solubility; Spent Acid-Water (Engineering Fundamentals No. 210)	11-17	295
Special Diamond Coring Recovers Nearly 100 Per Cent in Lime Formations	11-24	98
Oklahoma at Important Threshold With New Deep Pools	12- 8	76
Making Forms for Concrete and Setting Anchor Bolts (Engineering Fundamentals No. 213)	12- 8	113
Staking Foundations and Setting Batter Boards (Engineering Fundamentals No. 214)	12-15	129
Interstate Compact Discusses Submerged Lands, Natural Gas, Economic Trends	12-22	48
Concrete—Miscellaneous Details (Engineering Fundamentals No. 215)	12-22	93
BARR, V. L., EILERTS, C. K., and SMITH, R. V.		
Measuring Distribution of Liquids in Flowstring of a Gas-Condensate Well	12-15	91
BEACHAM, CLARENCE C., and WEST, THOMAS S.		
Precise Measurement of Deep Electrical Anomalies (Abs.)	4-14	96
BEAL, CARLTON		
The Viscosity of Air, Water, Natural Gas, Crude Oil and Gas-Saturated Crude Oil at Oil Field Temperatures and Pressures (A.I.M.E. Abs.)	11- 3	110
BEARDMORE, HERBERT, and MILLIKAN, C. V.		
Significance of Declining Productivity Index	9-29	123
BEDELL, A. E.
